Designs 12413-07 through 12413-12 are freestanding lace borders and corners with appliqué. Follow these simple steps to complete this technique.

### SUPPLIES

- Embroidery Thread
  - Use the same thread in the bobbin as the needle
- Premade or store bought napkin, table cloth, placemat, runner or other desired item.
- Water Soluble Mesh stabilizer
- Temporary Spray Adhesive

### HINTS

- For stiffer lace:
  - Cut away excess stabilizer.
  - Remove remaining stabilizer by rinsing under warm running water.
  - DO NOT RINSE away all of the stabilizer for a stiffer lace. However, do note that the thread may appear a shade darker if the stabilizer is not removed completely.
  - If you happen to wash too much out, easily re-stiffen by diluting stabilizer scraps in water and either dipping the item in the solution or brushing on with paint brush.
- For very soft lace:
  - Cut away excess stabilizer.
  - Remove remaining stabilizer by rinsing under warm running water until all traces of the stabilizer are gone.

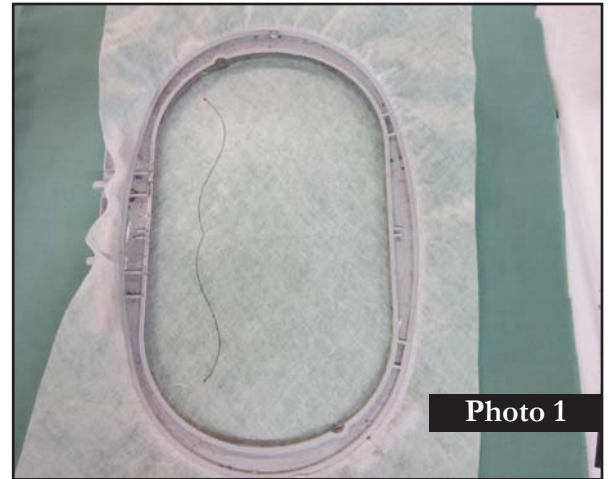

Photo 1

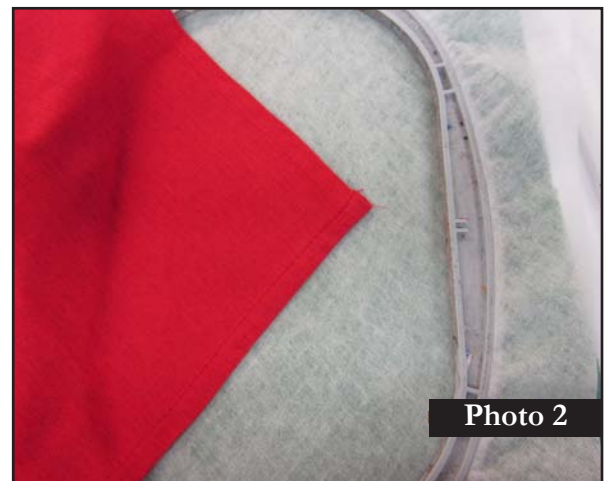

Photo 2

### GENERAL INSTRUCTIONS

- Hoop **two** layers of water soluble stabilizer.
- Attach the hoop to the machine and select the design of your choice.
- Stitch the first color which is the Placement Stitch. **Photo 1**
- Remove the hoop from the machine but do not remove the stabilizer from the hoop.
- Lightly spray the hooped stabilizer with temporary spray adhesive.
- If sewing a border piece place the edge (or if sewing a corner piece place the corner) of the fabric on the stabilizer. Match the edges of the fabric to the straight part of the stitched line. **Photo 2**
- Return the hoop to the machine and stitch the next color which is the Cut Line and Tackdown. **Photo 3**

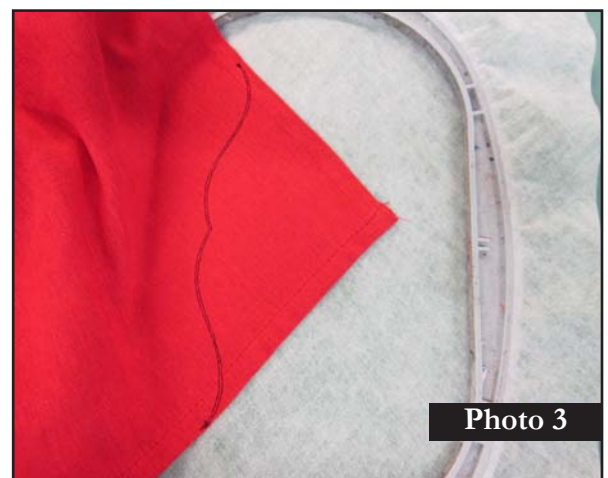

Photo 3

- Again, remove the hoop from the machine but do not remove the stabilizer from the hoop.
- Trim the fabric right up to the stitched Cut Line and Tackdown. **Photo 4**
- Return the hoop to the machine and stitch the third color, which will be the Appliqué Placement Stitch.
- Use the included appliqué patterns to cut out the required piece(s) for your selected design. **Photo 5**
- Lightly spray the wrong side of the pre-cut appliqué pieces with temporary spray adhesive and place in required position on hooped stabilizer. **Photo 6**
- Continue stitching the remainder of the design. **Photo 7**
- Cut away excess stabilizer and remove remaining stabilizer by rinsing under warm water. Refer to hints above for stiff or soft lace.
- Allow to air dry by laying the piece flat with right side down to prevent curling.
- If you need to press your item press it from the wrong side using a pressing cloth.

Photo 4

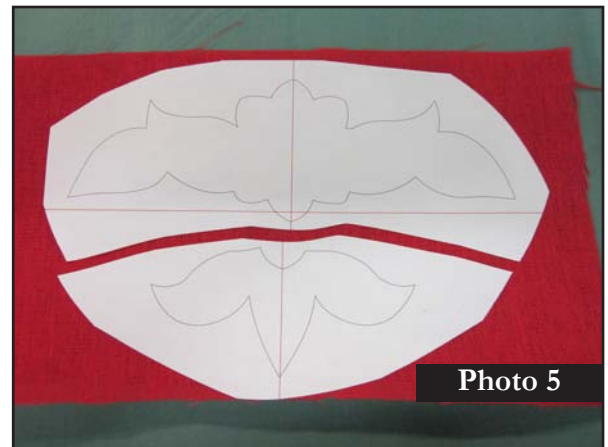

Photo 5

Photo 7

Photo 6

### SUPPLIES:

- Fabric
- Any firmly woven high quality fabric
- Thread
- Embroidery Thread
- Stabilizer
- Heavy Weight or Mesh Water-Soluble Stabilizer

### Optional Notions

- Embroider's Wand
- Temporary Adhesive Spray

### INSTRUCTIONS:

1. Lightly spray the top of a hoop-sized piece of water-soluble stabilizer with temporary adhesive spray.
2. Place the sprayed stabilizer onto the wrong side of the fabric. Hoop the stabilizer and fabric together.
3. Place the hoop on the machine and begin stitching the design.
4. AFTER the "cutwork guide stitch" has been stitched, remove the hoop from the machine. DO NOT remove the fabric from the hoop.

### PHOTO A

5. Use the sharp point of an embroider's wand to gently pull the fabric apart from the stabilizer.
6. Use a small sharp pair of scissors to clip away ONLY the fabric inside the guide stitches. Leave the stabilizer intact. Any enclosed area that is created by the first color of the design can be trimmed away to create the open work. **PHOTO B**
7. Return the hoop to the machine. Continue stitching the remainder of the embroidery design.
8. Follow manufacturer's instructions on stabilizer packaging to remove the stabilizer.

*NOTE: Refer to manufacturer's documentation for further in-depth instructions on using the CutWork Accessory. All fabric, designs and stabilizer combinations should be tested first. Proper preparation of the fabric, design and stabilizer are required to achieve the best results and may require adjustment based on combinations used. OESD is not responsible for final results.*

### PREPARE FABRIC

- Starch fabric 2-3 times following manufacturer's instructions.
- Fabric to be cut should be crisp.
- Use two layers of Heavy Weight CutAway or TearAway; spray to adhere to wrong side of your fabric.
- Hoop stabilizer and fabric.

### EMBROIDER AND CUT

1. Send desired design to the embroidery machine.
2. Designs enhanced to work with the CutWork tool will end in "CWC".
3. Replace normal stitch plate with the CutWork stitch plate
4. Attach the hoop to the machine.
5. Stitch the design as normal until the machine shows "Cut".

### PHOTO 1

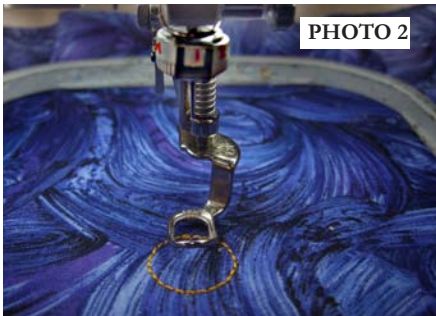

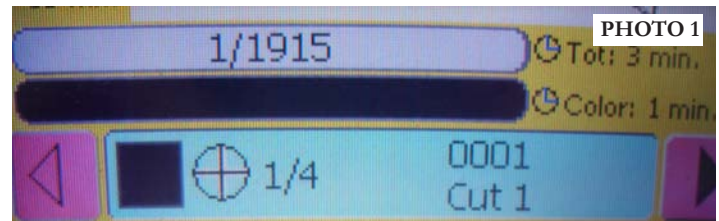

PHOTO 2

PHOTO 3

PHOTO 4

1. When the machine calls for cut 1, 2, 3 or 4 you must replace embroidery foot with foot #44 and replace your embroidery needle with the CutWork tool. (If you do not have foot #44 you can leave foot #15 on the machine). **PHOTO 2**
2. Unthread the machine.
3. Follow the "thread changes" on your machine screen and turn the dial on the CutWork tool as required.
4. After cuts are complete, remove hoop from machine but do not remove the fabric from the hoop.
5. Gently remove cut fabric piece. Do not pull the fabric to separate. Trim any areas not completely cut to help prevent frizzy ends.
6. Apply a piece of mesh water-soluble stabilizer over the cut pieces on the backside of the hoop, making sure to completely cover cut areas. **PHOTO 3**
7. When the machine calls for threads again, replace the needle and foot, rethread the machine and stitch as normal.
8. Repeat as required, until design is completed. **PHOTO 4**
9. Remove hoop from machine and fabric and stabilizer from hoop.
10. Carefully cut away excess stabilizer.
11. Follow instructions printed on stabilizer packaging to remove remaining stabilizer.

*NOTE: Designs shown in pictures are for instructional purpose only and may not be included in your collection.*
