Outer Space in 3-D Quilted Wall Hanging

Create an out-of-this-world 3-D wall hanging using a simple stitch and flip method that quilts as you go. Beginning quilters will find this method of quilting simple and fun while seasoned quilters will enjoy a break from the normal piecing technique. While this quilt is quite enjoyable without 3-D glasses, viewing the quilt with 3-D glasses will blast you into another dimension of quilt enjoyment.

SUPPLIES

- OESD Collection 12426 Outer Space in 3-D
- 1 yard black fabric for front of quilt
- 1 yard fabric for back of quilt (color or print of your choice)
- Chalk marker
- Medium weight tear-away stabilizer
- 3 yards 1/4" bias binding or self made binding
- Temporary spray adhesive if not using fusible batting

CUT

The front of this quilt is made up of six sections, refer to **Diagram A**. From the black fabric cut each of the six sections 2" larger than finished size as listed below.

- (2) 8" x 8" for sections A and B
- (2) 8" x 14" for sections C and D
- (2) 20" x 8" for sections E and F
- (1) 24" x 30" back fabric
- (1) 24" x 30" fusible batting

EMBROIDER

- Using a chalk marker, draw a 6" x 6" square on the black 8" x 8" fabric for sections A and B
- Using a chalk marker, draw a 6" x 12" rectangle on the black 8" x 14" fabric for sections C and D
- Using a chalk marker, draw a 18" x 6" rectangle on the black 20" x 8" fabric for sections E and F

Using medium weight tear-away stabilizer, embroider desired designs on each piece of black fabric, keeping designs within the drawn lines.

If you would like to replicate our layout, refer to **Diagram B** for design placement. *Note: Design 12426-02 Sun was purposely placed partially outside the drawn lines on our layout in section E.*

Diagram A

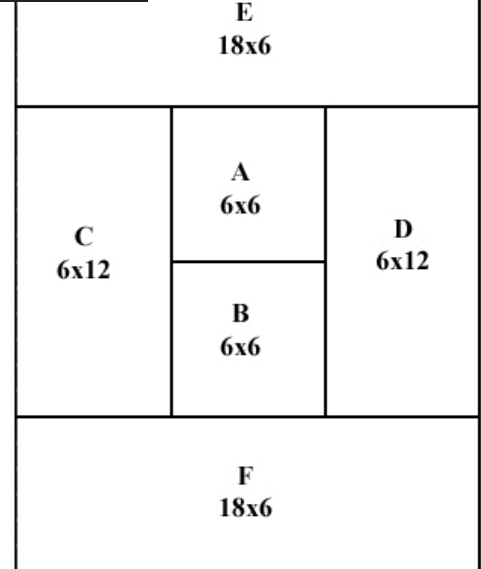

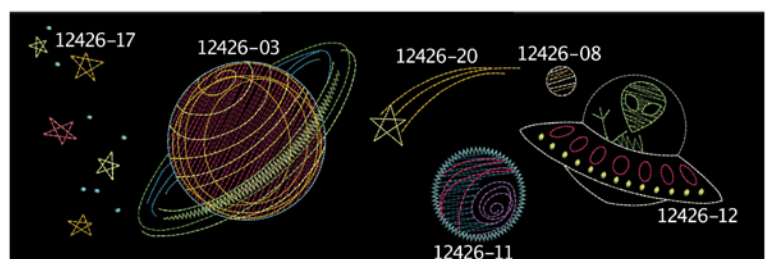

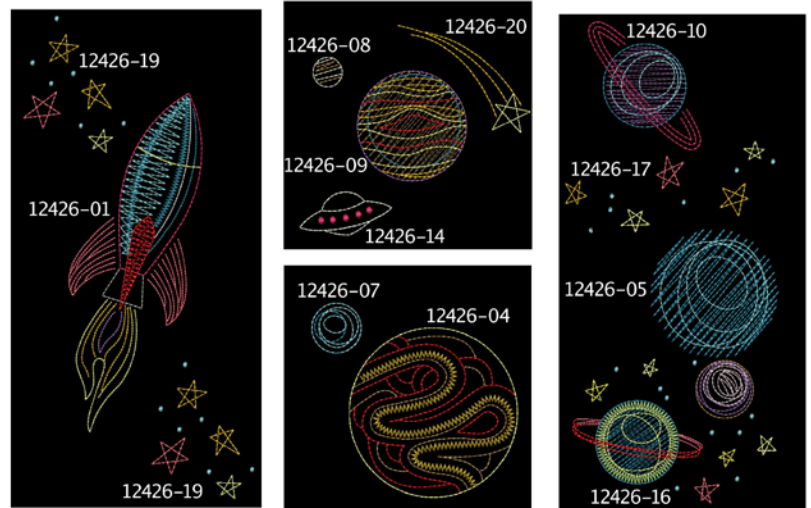

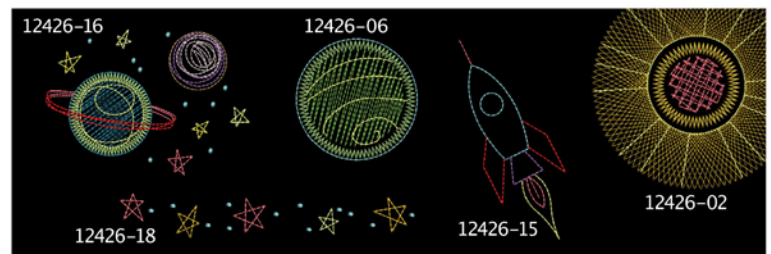

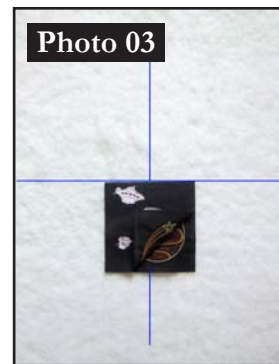

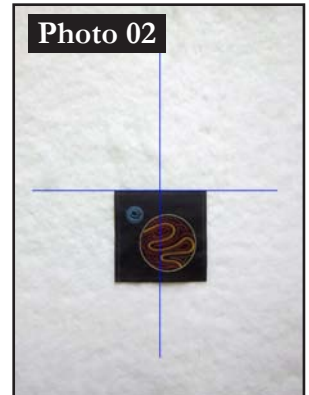

Diagram B

CONSTRUCT

Use ¼" seams unless stated otherwise.

- Cut the embroidered black fabric pieces down to required size:
 - Cut (2) 8" x 8" sections A and B to 6 ½" x 6 ½"
 - Cut (2) 8" x 14" sections C and D to 6 ½" x 12 ½"
 - Cut (2) 20" x 8" sections E and F to 18 ½" x 6 ½"
- Adhere the 24" x 30" batting to the wrong side of the 24" x 30" backing fabric by ironing if using fusible batting or by using temporary spray adhesive if not using fusible batting.
- Roughly mark center of the batting by drawing perpendicular horizontal and vertical lines. The center mark does not have to be absolutely perfect as our backing and batting are larger than the finished piece and will be cut down to size later. **Photo 01**
 - *Note: Drawn lines in some of the following photographs have been digitally enhanced for instructional purposes.*
- Place section B, right side up, so that the top of section B is lined up with the horizontal center and it is centered over the vertical center. **Photo 02**
- Place section A, right sides together on top of section B. The bottom edge of section B will be lined up with the top edge of section A. **Photo 03**
- Stitch along the top, sewing sections A and B together.
- Flip section A up and iron the seam using the tip of your iron. **Photo 04**
 - *Note: If using fusible batting be mindful not to touch the iron directly to the batting, avoiding getting the fusible substance on your iron.*
- Place section C, right sides together, on top of sections A and B. The left edge of sections A and B will be lined up with the right edge of section C. **Photo 05**
- Stitch along left edge, sewing section C to sections A and B.
- Flip section C to the left and iron the seam. **Photo 06**
- Place section D, right sides together on top of sections A and B. The right edge of sections A and B will be lined up with the left edge of section D. **Photo 07**
- Stitch along right edge, sewing section D to sections A and B.
- Flip section D to the right and iron the seam. **Photo 08**

- Place section E, right sides together on top of sections A, C and D. The top edge of sections A, C and D will be lined up with the bottom edge of section E. **Photo 09**
- Stitch along top edge, sewing section E to sections A, C and D.
- Flip Section E up and iron the seam. **Photo 10**
- Place section F, right sides together on top of sections B, C and D. The bottom edge of sections B, C and D will be lined up with the top edge of section F. **Photo 11**
- Stitch along bottom edge, sewing section F to sections B, C and D.
- Flip Section F down and iron the seam. **Photo 12**
- Trim rough edges and square up the center of the wall hanging.
- Remove any remaining drawn chalk lines.
- Bind edges using your favorite method.

Note: 3-D effect using 3-D glasses may not work for people with certain vision problems such as Amblyopia (lazy eye).
