GENERAL FREESTANDING LACE GUIDELINES

SUPPLIES:

Embroidery Thread:

- Use the same embroidery thread in the bobbin as the needle.

Needles:

- Use an Organ 80/12 Titanium needle for extended needle life.

Stabilizer:

- Use water-soluble stabilizer or film water-soluble stabilizer.

GENERAL INSTRUCTIONS

1. Hoop two layers of water-soluble stabilizer.
2. Attach the hoop to the machine and select the design of your choice.
3. Stitch the design.
4. Remove the hoop from the machine and the design from the hoop. Trim excess stabilizer from the design.
5. Rinse away remaining stabilizer and allow it to dry.

HANDY HINTS:

For Stiffer Lace:

- DO NOT RINSE away all of the stabilizer for a “stiffer” lace. However, do note that the thread may appear a shade darker if stabilizer is not removed completely.
- If you happen to wash too much out, easily re-stiffen by diluting some stabilizer scraps in water and dipping the item in the solution.

For Very Soft Lace:

- Cut away excess stabilizer. Remove remaining stabilizer by rinsing under warm running water until all traces of the stabilizer are gone.
- Note: If lace should become too limp to work with, dissolve stabilizer scraps in warm water and apply to the lace.

Drying Lace:

- Lay lace piece with right side down to dry. This will minimize the tendency for the lace to curl.

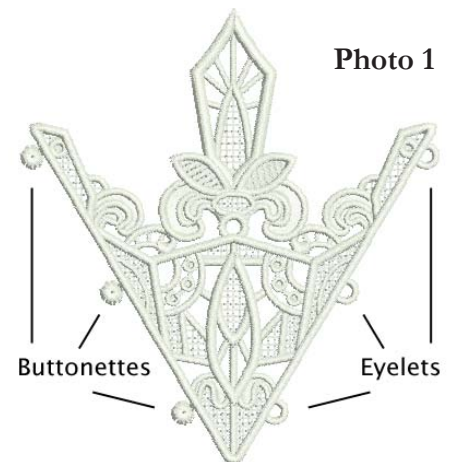

Instructions for Snowflake 7 (Design 12429-07)

Handy Tips:

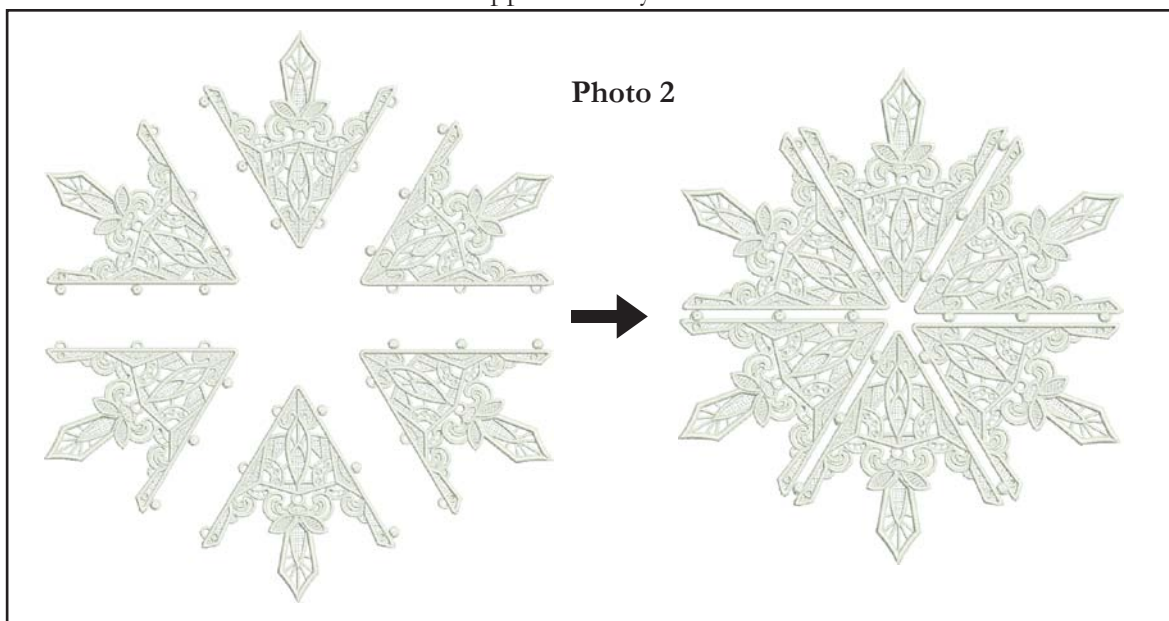

- A pair of tweezers, hemostats, stiletto or a tiny crochet hook can be extremely helpful when inserting the buttonettes into the eyelets. (Please see **Photo 01** for explanation of “buttonette” and “eyelet”.)
- Insert the tip of the tweezers, hemostats or crochet hook into the eyelet, grasp the buttonette and pull through the eyelet.
- A Stiletto could be used to “push” the buttonette through the eyelet.
- The lace looks best when left fairly stiff. When the design is finished stitching, wash the design lightly so that some of the water-soluble stabilizer stays in the design. It is better to hold the lace gently and allow the water to flow through rather than working at it or scrubbing the lace.
- If item becomes too limp to work with, dissolve scrap pieces of water-soluble stabilizer in warm water and apply to the item to re-stiffen.
- Alternatively you can iron the appliqué pieces on the wrong side while applying spray starch. After ironing, spray again with starch and allow to dry completely. This will stiffen the lace pieces nicely and aid in construction.

Snowflake 7:

Stitch Snowflake 7 piece (12429-07) 6 times. Connect all six pieces together by inserting the buttonettes from the left side of one piece into the eyelets from the right side of another piece. (See **Photo 2**)

Finished size = approximately 9" in diameter

Snowflake Elegance: Cheerful Table Runner

Supplies

- Medium weight tear-away stabilizer (3 pieces large enough for a large hoop)
- Water soluble mesh stabilizer (2 pieces large enough for a large hoop, or four pieces for a medium hoop)
- Bobbin thread
- White embroidery thread
- 2 buttons
- 2 ¼ yards wide white ric-rac
- Temporary adhesive spray or temporary adhesive tape

Tools and Accessories

- Rotary cutter and mat
- Quilt ruler
- Edge-stitch foot
- Button sew-on foot (optional, hand needle and thread may be used)
- Large embroidery hoop
- Iron

Fabrics

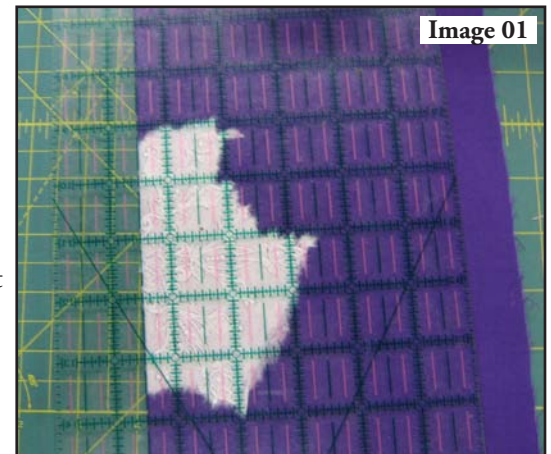

This project is a great way to use up scraps. Just make sure you have enough of each color to cut the pieces listed. If you are buying fabric, use the yardages listed

- ⅓ yard Dark Purple Fabric
Cut 3 pieces 15" by 11"
- 1 fat quarter green fabric
Cut 3 pieces 2" by 11"
Cut 1 piece 3" by 11"
- 1 fat quarter pink plaid fabric
Cut 1 piece 5" by 11"
Cut 1 piece 4" by 11"
- 1 fat quarter hot pink fabric
Cut 1 piece 4.5" by 11"
Cut 1 piece 5.5" by 11"
- ½ yard light purple fabric (true width must be at least 41")
Cut to 41" by 11"

Step One: Embroider The Fabric

1. Hoop a piece of dark purple fabric (15" by 11") with a single sheet of medium weight tear away in a large hoop. Embroider design 12429-09.
2. Remove the hoop from the machine and the fabric from the hoop. Tear away the excess stabilizer and press.
3. Trim this piece to 8" by 11", centering the design. Tip: Fold the fabric in half lengthwise. Trim 4" from the fold widthwise. Unfold, then fold again the other direction and trim to 5.5" from the fold. See **Image 01**.
4. Hoop another piece of dark purple fabric with a single layer of medium weight tear away. Embroider design 12429-22.
5. Tear away excess stabilizer. Trim this piece to 8" by 11" as with the first design.
6. Hoop the third piece of dark purple fabric with a single layer of medium weight tear away. Embroider design 12429-26.
7. Tear away excess stabilizer. Trim this piece to 2" by 11".

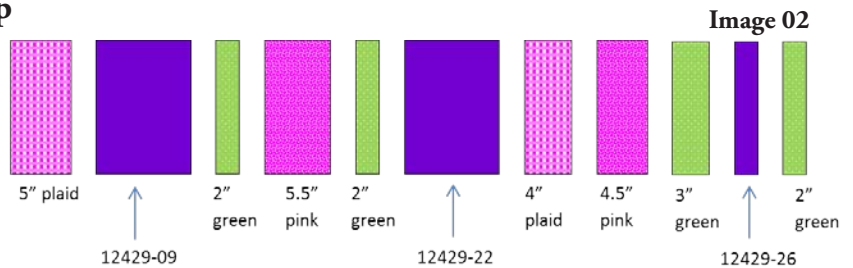

Step Two: Embroider the Free-Standing Lace

1. Hoop two layers of Mesh Wash Away stabilizer in a large hoop. Thread your machine with the same white polyester embroidery thread in the top and the bobbin.
2. Embroider design 12429-01 twice in the same hoop, making sure to move the designs so they do not overlap. You can also stitch one of each design separately in two hoopings.
3. Rough-cut the excess stabilizer around the designs. Wash away the excess stabilizer with warm running water. Set aside to dry.

Step Three: Assemble the Table Runner Top

1. Lay out your table runner pieces according to the diagram shown in **Image 02**.
2. Starting from left to right, sew each piece to the next piece with a $\frac{1}{4}$ " seam along the long edge.
3. When you have sewn all the pieces together, press the seams to one side.

Step Four: Sew the Back onto the Table Runner

1. Place the 41" by 11" piece of fabric right sides together with your table runner. The back should be slightly longer than the front on both ends.
2. Pin in place.
3. Stitch the front to the back by sewing a $\frac{1}{4}$ " seam down each long side. Leave the short ends open.
4. Trim any excess back fabric so the front and back of the table runner are the same length.
5. You will now have a long tube. With the tube still wrong sides out, press the two side seams, making sure not to put a permanent crease into the backing fabric as you do so. This will make a crisper edge when you turn the project right side out. See **Image 03**.
6. Turn the tube right side out.
7. Press well along side seams. See **Image 04**.

Step Five: Topstitch the Table Runner and Add Ric-Rac.

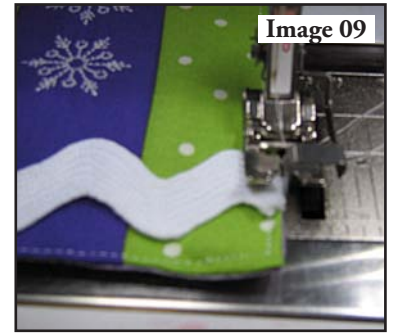

1. Fold in each open end of the table runner approximately $\frac{1}{2}$ " and press well. See **Image 05**.
2. Using an edge-stitching foot, topstitch approximately $\frac{1}{8}$ " from the edge of the runner along all four sides. See **Image 06**.
3. Cut two pieces of ric-rac approximately 40" long. (Measure against your finished table runner.)
4. Lightly spray the back of the ric-rac with temporary adhesive spray or affix a temporary adhesive/iron-on tape (such as Steam-A-Seam 2).
5. Place the ric-rac pieces onto the runner so they run $\frac{1}{4}$ " from the edge of the runner. See **Image 07**. Iron in place if using iron-on tape.

6. Stitch down the center of each piece of ric-rac to secure it to the table runner. See **Image 08**.
7. Zig Zag over each end of the ric-rac to prevent fraying. See **Image 09**.

Step Six: Attach the free-standing snowflakes.

1. Determine where you want to place your free-standing snowflakes. Snowflakes will be tacked to the table runner with a button, so lay out both the lace pieces and the buttons and then mark the center of the placement with a water-soluble pen. See **Image 10**.
2. Using a button sew-on foot or hand needle and thread, stitch the snowflakes and buttons to the table runner. See **Image 11**.

Your table runner is now complete! Enjoy your colorful centerpiece all season long.
