FSA - Freestanding Appliqué

FSL - Freestanding Lace

General Freestanding Appliqué Guidelines

Supplies:

Embroidery Thread:

- Use the same embroidery thread in the bobbin as the needle.

Needles:

- Use an Organ 80/12 Titanium needle for extended needle life.

Stabilizer:

- Use water-soluble stabilizer or film water-soluble stabilizer.

General Appliqué Instructions

1. Hoop two layers of water-soluble stabilizer.
2. Attach the hoop to the machine and select the design of your choice.
3. Stitch the Placement Stitch. **Photo 1**
4. Place a piece of appliqué fabric over the Placement Stitch so that it is completely covered.
5. Stitch the Cut Line & Tackdown Stitch.
6. Carefully cut away the excess appliqué fabric. **Photo 2**
7. Stitch the remainder of the design and repeat for any remaining pieces. **Photo 3**
8. Remove the hoop from the machine and the design from the hoop.
9. Trim excess stabilizer from the design.
10. Rinse away remaining stabilizer and allow it to dry.

Handy Hints

For 3D Appliqué Projects:

- Adhere 2 layers of heavy weight stabilizer to the back of fabrics with temporary adhesive spray **BEFORE** hooping or placing down for tackdown and cut in place. This gives fabric a more rigid structure.
- A pair of tweezers, hemostats, stiletto or a tiny crochet hook can be extremely helpful when inserting the buttonettes into the eyelets. (See **Diagram 1** for explanation of “buttonette” and “eyelet”.)
- Insert the tip of the tweezers, hemostats or crochet hook into the eyelet, grasp the buttonette and pull through the eyelet. Or a stiletto could be used to push the buttonette through the eyelet.
