7005 (SN-1) Silver	

Freestanding Lace Charms

Instructions

General Freestanding Lace Guidelines

Supplies:

Embroidery Thread:

- Use the same embroidery thread in the bobbin as the needle.

Needles:

- Use an Organ 80/12 Titanium needle for extended needle life.

Stabilizer:

- Use water-soluble stabilizer or film water-soluble stabilizer.

Handy Hints:

For Stiffer Lace:

- DO NOT rinse away all of the stabilizer for a “stiffer” lace. Note that the thread may appear a shade darker if stabilizer is not removed completely.
- If you happen to wash too much out, easily re-stiffen by diluting some stabilizer scraps in water and dipping the item in the solution.

For Very Soft Lace:

- Cut away excess stabilizer. Remove remaining stabilizer by rinsing under warm running water until all traces of the stabilizer are gone. **Note:** If lace should become too limp to work with, dissolve stabilizer scraps in warm water and apply to the lace.

Drying Lace:

- The lace looks best when left to dry completely. Lay lace piece with right side down to dry. This will minimize the tendency for the lace to curl. Be sure to flatten the piece out entirely and allow ample time to dry.

General Instructions

1. Hoop two layers of water-soluble stabilizer.
2. Attach the hoop to the machine and select the design of your choice.
3. Stitch the design.
4. Remove the hoop from the machine and the design from the hoop. Trim excess stabilizer from the design.
5. Rinse away remaining stabilizer and allow it to dry.

SUPPLIES

- OESD Badgemaster
- OESD Water soluble topping
- 1 1/2" wide grosgrain ribbon, in desired length (design will be approximately 6" long)
- 505 Temporary Adhesive Spray

INSTRUCTIONS

- Hoop a layer of OESD Badgemaster. **PHOTO 1**
- Stitch the first color change, *Ribbon Placement Guide*. **PHOTO 2**
- Lightly spray the Badgemaster with 505 Temporary Adhesive Spray. **PHOTO 3**
- Place the ribbon over the guide so that the embroidery will be in the desired location. Remember to consider the orientation you want to use when deciding which direction to place the ribbon. **PHOTO 4**
- Smooth the ribbon into place, making sure to get good contact between the ribbon and the Badgemaster. **PHOTO 5**
- Place a piece of OESD Water soluble topping over the ribbon. Smooth into place, adhering it to the Badgemaster on either side of the ribbon. **PHOTO 6**
- Stitch the next color change, *Basting Stitch*. **PHOTO 7**
- Stitch the remaining color changes to finish the design. **PHOTO 8**
- Note that the lettering stitch is intentionally a light density. This is to prevent puckering and ensure a smooth look on the grosgrain ribbon. **PHOTO 9**
- Use a seam ripper to remove the basting stitches. **PHOTO 10**
- Tear away the excess Badgemaster and topping. Rinse any remaining stabilizer away and allow to dry.
- Press the ribbon embroidery side down into a towel or thick pressing cloth and press well. **PHOTO 11**
- Fold the ribbon ends in half lengthwise and cut at an angle to form a "v" shape. **PHOTO 12**
- Tie the ribbon as desired. **PHOTO 13**
- To add the charm to the center of the bow, use an awl to poke a hole in the center of the bow. **PHOTO 14**
- Open a large jump ring and thread it through the hole you created in the previous step. **PHOTO 15**
- Add a smaller jump ring to the top of the charm, then thread this onto the ring you added to the bow. Close the larger jump ring and your charm is added. **PHOTO 16**
