Pre-Cut Appliqué Instructions

1. Print out the necessary pages from the PDF of the appliqué pattern(s).
2. Mark the right side of the pattern pieces so you'll know which direction to lay the pattern on the fabric.
3. Lightly spray the wrong side of the pattern pieces with temporary adhesive spray and allow it to set for a few minutes.
4. Place the pattern pieces on the right side of the fabric and carefully cut them out. **PHOTO 1**
5. Sew the placement stitch on your hooped fabric. **PHOTO 2**
6. With the paper still stuck to the right side of the appliqué fabric, spray the wrong side of the fabric with temporary spray adhesive.
7. Place the fabric inside the placement stitch, so that it completely covers the placement stitch and then remove the paper pattern. **PHOTO 3**
8. Sew the tackdown. **PHOTO 4**
9. Sew the remainder of the design and repeat for any remaining pieces. **PHOTO 5**

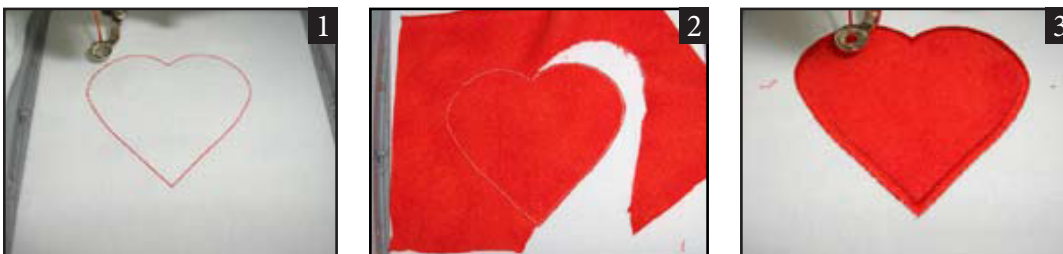

NOTE: The patterns are sized for the designs as they were made. If you resize the design, you will need to resize the pattern the same amount. You can print out the pattern at the normal size then copy it on a copy machine at the changed size. For example, resize the designs to 80%, resize the printed pattern to 80%.

TIP: When Printing the patterns, make sure that the “Fit to page” option is **UNCHECKED** in the Print Dialog Box. If this option is checked the printed patterns will not be actual size.

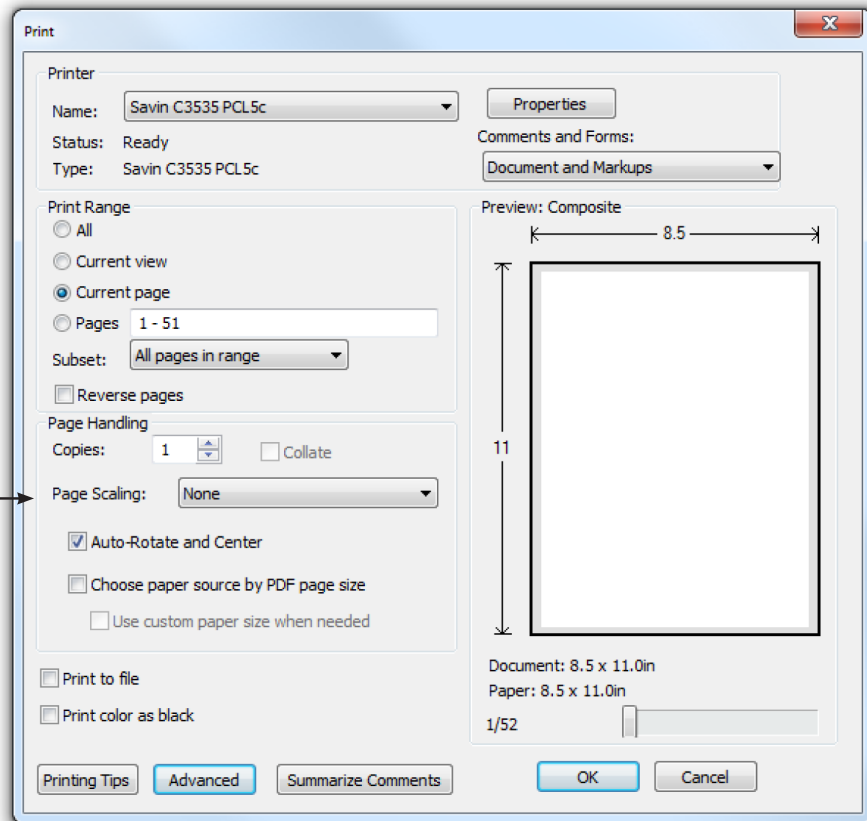

Cut-in-Place Appliqué Instructions

1. Hoop your fabric and backing.
2. Sew the placement stitch. **PHOTO 1**
3. Place a piece of appliqué fabric over the placement stitch so that it is completely covered.
4. Sew the cut line & tackdown.

Supplies

- Outer Fabric - $\frac{2}{3}$ yard (44" wide)
- Inner (lining) Fabric - $\frac{2}{3}$ yard (44" wide)
- Interfacing - 1 $\frac{1}{4}$ yard (22" wide)
- 14" Zipper
- 4 1" D-Rings
- Felt Scrap - 6" x 8"
- Appliqué Fabric - 6" x 6"
- OESD HeavyWeight Tear Away Stabilizer
- $\frac{1}{2}$ " Double Fold Bias Binding (can be made from lining fabric) - 2 $\frac{1}{2}$ yard

Construction

- Print pattern pieces and assemble. Cut main fabric and interfacing according to the pattern. Prepare lining pieces by fusing interfacing on the back of each piece according to manufacturer's instructions.

- For all color changes, use the Isacord thread indicated by the thread chart in the top and OESD pre-wound bobbin thread.

- Hoop the pocket piece with OESD heavy tear away stabilizer. **PHOTO 1**

- Load the hoop in the machine and begin stitching the first color change, *Placement Stitch*. **PHOTO 2**

- Remove the hoop from the machine. Lightly spray a piece of appliqué fabric with temporary spray adhesive and place over the placement line. Replace the hoop and stitch the next color change, *Cut Line and Tackdown*. Note the double line, which allows you to trim very close to the cut line.

- Remove the hoop from the machine. Carefully trim to the cut line using OESD curved embroidery scissors around the appliqué. **PHOTO 3**

- Replace the hoop and stitch the remaining color changes. **PHOTO 4**

- Remove the hoop from the machine. Trim the jump stitches prior to unhooping the stabilizer. Gently tear away the stabilizer close to the design. Cut the pocket to size according to pattern piece.

- With the inner pocket pieces right sides together, sew $\frac{1}{4}$ " around the edge leaving a 2 - 3" opening for turning to the inner pocket. With the outer pocket pieces right sides together, sew $\frac{1}{4}$ " along the top edge. **PHOTO 5**
