## Isacord and Yenmet Metallic Thread Colors Used in “Deck The Halls Ornaments”

Collection #12696

0015 White	5531 Pear	7034 (AN8) Pearlessence
0542 Ochre	7003 (AN1) Pearlessence	Pink/Rose
1902 Poinsettia	White	

## General Freestanding Lace Guidelines

### Supplies:

#### Embroidery Thread:

- Use the same embroidery thread in the bobbin as the needle.

#### Needles:

- Use an Organ 80/12 Titanium needle for extended needle life.

#### Stabilizer:

- Use water-soluble stabilizer or film water-soluble stabilizer.

### Handy Hints:

#### For Stiffer Lace:

- DO NOT rinse away all of the stabilizer for a “stiffer” lace. Note that the thread may appear a shade darker if stabilizer is not removed completely.
- If you happen to wash too much out, easily re-stiffen by diluting some stabilizer scraps in water and dipping the item in the solution.

#### For Very Soft Lace:

- Cut away excess stabilizer. Remove remaining stabilizer by rinsing under warm running water until all traces of the stabilizer are gone. **Note:** If lace should become too limp to work with, dissolve stabilizer scraps in warm water and apply to the lace.

#### Drying Lace:

- The lace looks best when left to dry completely. Lay lace piece with right side down to dry. This will minimize the tendency for the lace to curl. Be sure to flatten the piece out entirely and allow ample time to dry.

Diagram 1

### General Instructions

1. Hoop two layers of water-soluble stabilizer.
2. Attach the hoop to the machine and select the design of your choice.
3. Stitch the design.
4. Remove the hoop from the machine and the design from the hoop. Trim excess stabilizer from the design.
5. Rinse away remaining stabilizer and allow it to dry.

### Handy Hints:

#### For 3D Lace Projects:

- Rinsing out lace with very hot water can cause wrinkles in some fabrics after it has been embroidered. To prevent this, pre-shrink cotton fabric by washing it in warm water and drying it in a dryer.
- If item becomes too limp to work with, iron the appliqué pieces on the wrong side while applying spray starch. After ironing, spray again with starch and allow to dry completely. This will stiffen the lace pieces nicely and aid in construction.
- A pair of tweezers, hemostats, stiletto or a tiny crochet hook can be extremely helpful when inserting the buttonettes into the eyelets. (Please see **Diagram 1** for explanation of “buttonette” and “eyelet”)
- Insert the tip of the tweezers, hemostats or crochet hook into the eyelet, grasp the buttonette and pull through the eyelet. Or a stiletto could be used to push the buttonette through the eyelet.

### Assembly Instructions

- Many of the ornaments in this collection are designed to be layered for a dimensional effect. To create the layered look:
- See the diagrams on the following pages to determine the needed pieces for your desired ornament.
- Follow the general freestanding lace instructions and the thread chart to stitch each piece. Rinse away the excess AquaMesh stabilizer and allow to dry completely. Dry items flat and press when complete. For best results, press on an OESD Perfect Embroidery Press Cloth to avoid flattening the stitches. **Photo 01**
- Within each design is an alignment circle (or circles). These are stitched with a special grid stitch to make them easier to identify and stitch together. **Photo 02**
- Layer the pieces according to the diagram. The red dots indicate alignment circles. These will also be the locations to tack the pieces together. **Photo 03**
- Place a darning foot on your sewing machine. Thread the top thread with a color matching the alignment circle on the top piece and the bobbin thread with a color matching the alignment circle on the bottom piece. **Photo 04**
- Place the two aligned circles under the darning foot directly on top of each other. **Photo 04**
- Using a bar tack or button sew-on stitch, sew the two layers together in the center of the circle. **Photo 05**
- Repeat for any additional alignment circles as marked on the diagram.
- If the ornament has more than two layers, it is easiest to attach the bottom two layers together first, and then add the third layer over the top. **Photo 06 and 07**
- Alternately, you may choose to glue the pieces together using a clear fabric glue or low-temp hot glue at the alignment circles.
- To create even more unique ornaments, try different layering combinations and the possibilities are endless!

### To shape the pieces for even more dimension:

- First sew the pieces together as described above, and then gently warm the lace with a hair dryer. While the pieces are still warm, shape them with your hands. Hold the pieces in place until they cool. **Photo 08 and 09**
- If ornaments become flattened during storage, they can be reshaped using the same method.
