## Supplies

- OESD Ultra Clean and Tear stabilizer
- 505 Temporary Adhesive Spray
- Felt
- Keyring

## Instructions

1. Hoop one sheet of ultra clean and tear stabilizer. Cut two pieces of felt large enough to cover the design and more. **Photo 1**

2. Stitch color 1, *Front Felt Placement Stitch*. **Photo 2**

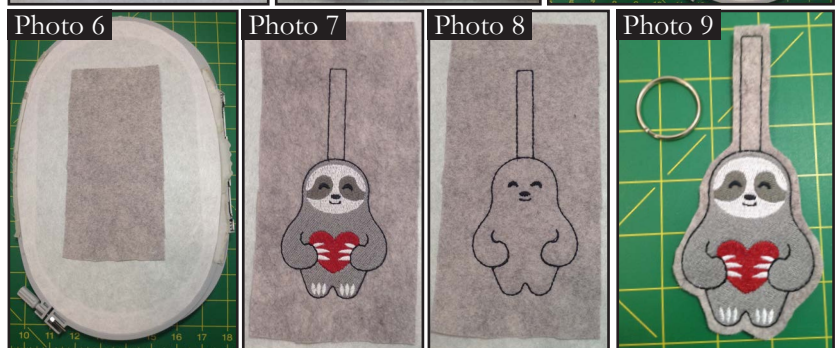

3. Lightly spray wrong side of felt with temporary adhesive spray. Place felt over placement stitch, assuring placement stitch is fully covered. **Photo 3**

4. Stitch design, stopping at the last color change. **Photo 4**

**DO NOT SEW LAST COLOR YET.**

5. Remove hoop from machine. Lightly spray wrong side of 2<sup>nd</sup> piece of felt with temporary adhesive spray. Place felt on backside of design, making sure to completely cover the design. **Photos 5 & 6**

*(Tip: If your pieces of felt are cut identically you can simply lineup the edges of your felt.)*

6. Match your bobbin thread to the last color. Place hoop back onto machine and stitch last color. **Photos 7 & 8**

7. Remove hoop from machine and design from the hoop. Using the outline stitch as a guide, trim the design ¼" from the outline. **Photo 9**

8. Loop the felt tab through the key ring. Fold tab in half and secure tab with a straight stitch at the top of the design's outline.
