EMBROIDERY

STEP 1

- Prep fabric by applying 2 sheets of Fusible Woven CutAway to the wrong side of the fabric.
- **Note** - this stabilizes your fabric so it isn't too limp and produces a nice crisp project.

STEP 2

- Hoop two sheets of AquaMesh.
- Stitch Machine Step 1, the Placement Stitch.

STEP 3

- Place fabric over placement stitch and cover stitches completely.
- Stitch Machine Step 2, the Cut Line and Tackdown.
- **Optional** - use TearAway tape to hold fabric in place.

EMBROIDERY

STEP 4

- Remove tape carefully.
- Remove hoop from machine, **DO NOT** unhoop fabric/stabilizer.
- Trim along cut line.

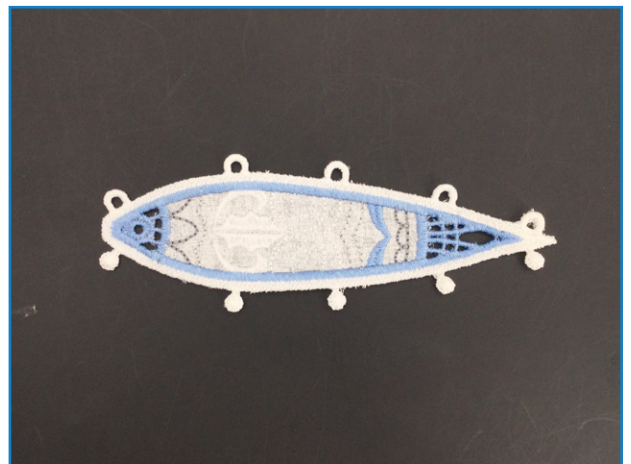

STEP 5

- Complete the remaining Machine Steps of the design changing colors as required.

STEP 6

- Wash away stabilizer and let dry.
- **Note** - for instructions and tips, see last page.

General Freestanding Lace Guidelines

Supplies:

Embroidery Thread:

- Use the same embroidery thread in the bobbin as the needle.

Needles:

- Use an Organ 80/12 Titanium needle for extended needle life.

Stabilizer:

- Use OESD AquaMesh stabilizer.

Handy Hints:

For Stiffer Lace:

- DO NOT rinse away all of the stabilizer for a “stiffer” lace. Note that the thread may appear a shade darker if stabilizer is not removed completely.
- If you happen to wash too much out, easily re-stiffen by diluting some stabilizer scraps in water and dipping the item in the solution.

For Very Soft Lace:

- Cut away excess stabilizer. Remove remaining stabilizer by rinsing under warm running water until all traces of the stabilizer are gone. **NOTE:** If lace should become too limp to work with, dissolve stabilizer scraps in warm water and apply to the lace.

Drying Lace:

- The lace looks best when left to dry completely. Lay lace piece with right side down to dry. This will minimize the tendency for the lace to curl. Be sure to flatten the piece out entirely and allow ample time to dry.

General Instructions

1. Hoop two layers of OESD AquaMesh Stabilizer.
2. Attach the hoop to the machine and select the design of your choice.
3. Stitch the design.
4. Remove the hoop from the machine and the design from the hoop. Trim excess stabilizer from the design.
5. Rinse away remaining stabilizer and allow it to dry.

Handy Hints:

For 3D Lace Projects:

- If item becomes too limp to work with, iron the lace pieces on the wrong side while applying spray starch. After ironing, spray again with starch and allow to dry completely. This will stiffen the lace pieces nicely and aid in construction.
- A pair of tweezers, hemostats, stiletto or a tiny crochet hook can be extremely helpful when inserting the buttonettes into the eyelets. (Please see **Diagram 1** for explanation of “buttonette” and “eyelet”.)
- Insert the tip of the alligator clamps, tweezers, hemostats or crochet hook into the eyelet, grasp the buttonette and pull through the eyelet. Or a stiletto could be used to push the buttonette through the eyelet.
