# EMBROIDERY

## STEP 1

- Using the Fiber Form pattern included with these instructions, place on top of appropriate size of Fiber Form and cut the piece out just on the inside of the lines.

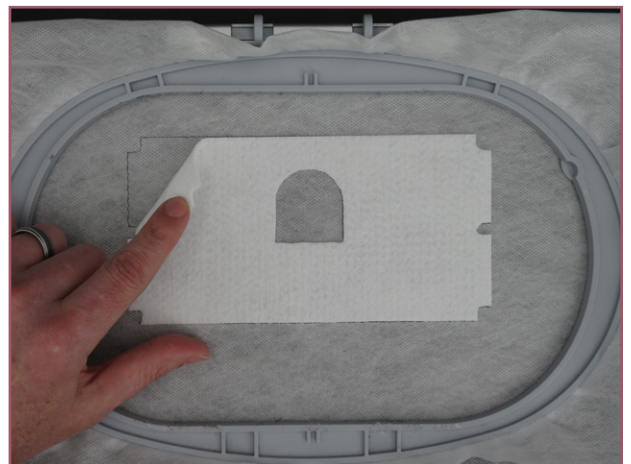

## STEP 2

- Hoop 2 layers of OESD AquaMesh. Stitch the first color change, which will be the Placement Stitch.

## STEP 3

- Lightly spray back of Fiber Form piece and center on Placement Stitch line.

# EMBROIDERY

## STEP 4

- Lightly spray back of fabric and place over the Placement Stitch and Fiber Form pattern. Flip the hoop over and place the second piece of fabric over Placement Stitch.

## STEP 5

- Sew the next color change Cut Line and Tackdown.

## STEP 6

- Remove the hoop from the machine and trim the fabric along the Cut Line. Flip the hoop over and repeat the process.

# EMBROIDERY

## STEP 7

- After sewing is completed, remove the design from the hoop and trim off some of the extra stabilizer. Wash away the remaining stabilizer and lay flat face down to dry.

# ASSEMBLY

## STEP 1

- Fold the bad sides of Right and Left Manger Wall inward and attach the corners .

## STEP 2

- Attach the good side of the Back Wall to the Right and Left Manger Walls. Connect the corners to the inside of the side Manger Walls.

# INSTRUCTIONS

## STEP 1

- With the bad side of the Back Trellis facing down, attach the Roof, good side facing up, to the Back Trellis.

## STEP 2

- Attach the Roof to the bad side of the Front Trellis.

# INSTRUCTIONS

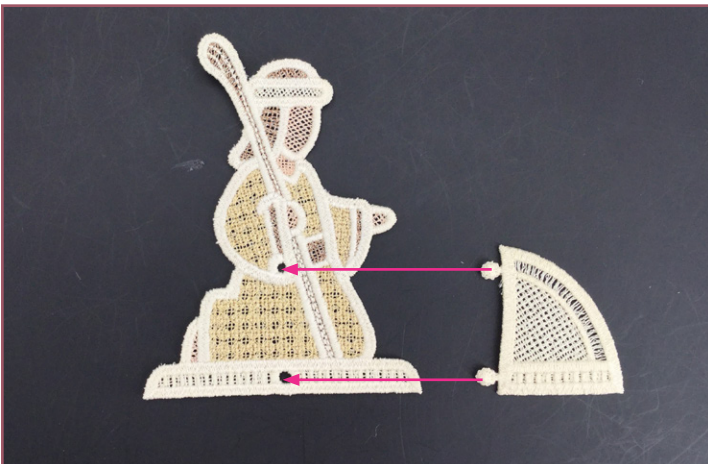

## STEP 1

- Attach the Roof to the Back and Side Walls.

## STEP 2

- Attach the Stands to the back of the people and animals.

## General Freestanding Lace Guidelines

### Supplies:

#### Embroidery Thread:

- Use the same embroidery thread in the bobbin as the needle.

#### Needles:

- Use an Organ 80/12 Titanium needle for extended needle life.

#### Stabilizer:

- Use OESD AquaMesh stabilizer.

### Handy Hints:

#### For Stiffer Lace:

- DO NOT rinse away all of the stabilizer for a “stiffer” lace. Note that the thread may appear a shade darker if stabilizer is not removed completely.
- If you happen to wash too much out, easily re-stiffen by diluting some stabilizer scraps in water and dipping the item in the solution.

#### For Very Soft Lace:

- Cut away excess stabilizer. Remove remaining stabilizer by rinsing under warm running water until all traces of the stabilizer are gone. **NOTE:** If lace should become too limp to work with, dissolve stabilizer scraps in warm water and apply to the lace.

#### Drying Lace:

- The lace looks best when left to dry completely. Lay lace piece with right side down to dry. This will minimize the tendency for the lace to curl. Be sure to flatten the piece out entirely and allow ample time to dry.

### General Instructions

1. Hoop two layers of OESD AquaMesh Stabilizer.
2. Attach the hoop to the machine and select the design of your choice.
3. Stitch the design.
4. Remove the hoop from the machine and the design from the hoop. Trim excess stabilizer from the design.
5. Rinse away remaining stabilizer and allow it to dry.

### Handy Hints:

#### For 3D Lace Projects:

- If item becomes too limp to work with, iron the lace pieces on the wrong side while applying spray starch. After ironing, spray again with starch and allow to dry completely. This will stiffen the lace pieces nicely and aid in construction.
- A pair of tweezers, hemostats, stiletto or a tiny crochet hook can be extremely helpful when inserting the buttonettes into the eyelets. (Please see **Diagram 1** for explanation of “buttonette” and “eyelet”.)
- Insert the tip of the alligator clamps, tweezers, hemostats or crochet hook into the eyelet, grasp the buttonette and pull through the eyelet. Or a stiletto could be used to push the buttonette through the eyelet.
