Notes

Embroider one of each design file 12901-01 through 12901-32 following the background fabric chart for background fabric placement.

For each hooping, cut the following 10" x 15", or large enough to hoop:

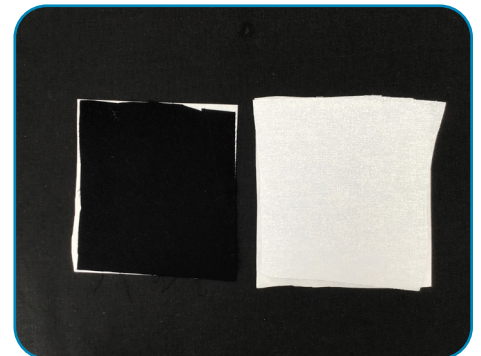

- 1 layer of Fusible Woven
- 1 layer of Heavy Weight TearAway
- 1 layer of Ultra Clean and Tear
- 1 layer of background fabric

Note: To economize on fabric, cut the fabric 15" wide (or the height of the hoop + 2") x width of the fabric. Apply the stabilizers. Move the hoop down the length of the fabric as each block is stitched. Leave a minimum of 1.5" between the blocks.

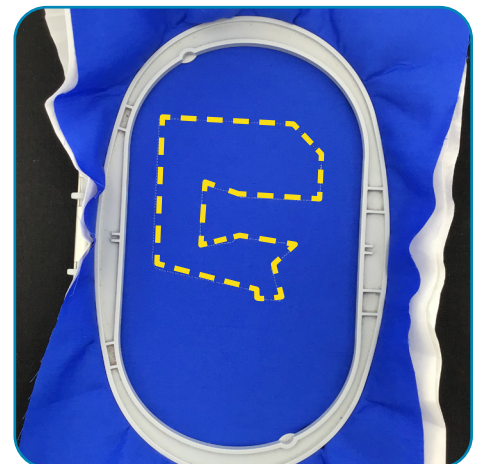

STEP 1

- Apply one layer of Fusible Woven to the wrong side of the applique fabric.

STEP 2

- Load selected design into the machine.
- Example design is 12901-15.
- Thread the machine per the thread chart.
- Place hoop on the machine.
- Stitch Machine Step 1, Gray Fabric Placement Stitch.

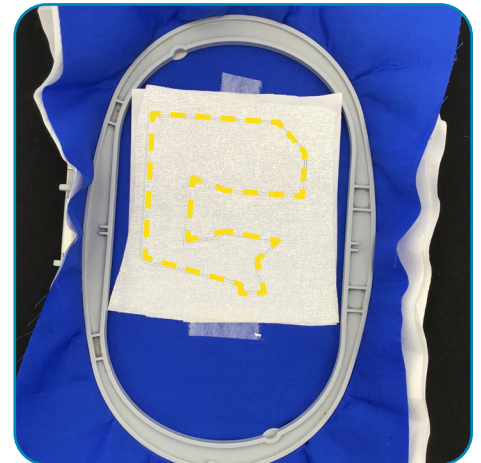

STEP 3

- Remove the hoop from the machine, but NOT the project from the hoop.
- Completely cover the placement stitch with the prepared fabric.
- Tape in place to secure.
- Return the hoop to the machine.

STEP 4

- Stitch Machine Step 2, Cut Line and Tackdown.

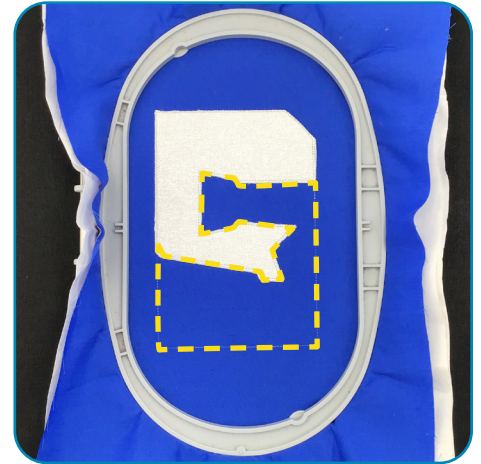

STEP 5

- Remove the hoop from the machine, but NOT the project from the hoop.
- Place on a flat surface.
- Trim the excess fabric as close to the cut line as possible.
- Note: If the outermost stitches (cut line) are cut, the inner stitches (tackdown) will hold the applique in place.

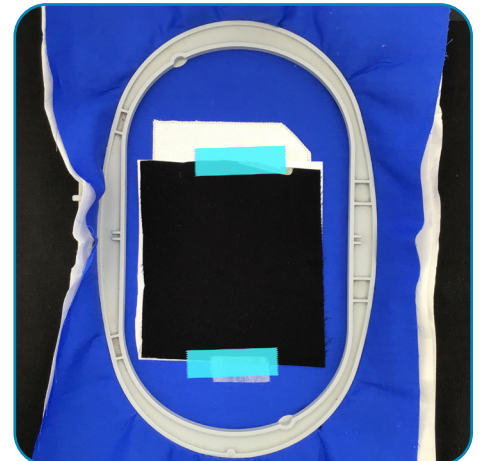

STEP 6

- Stitch Machine Step 3, Black Fabric Placement Stitch.

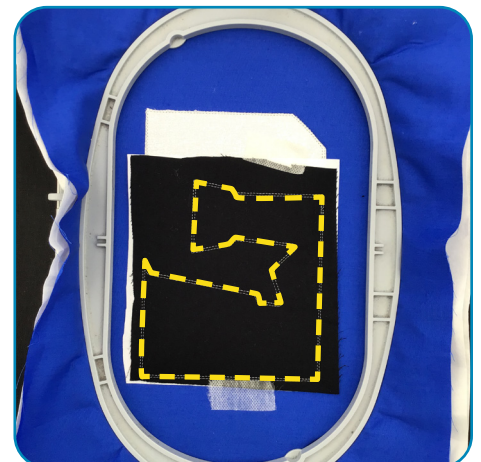

STEP 7

- Remove the hoop from the machine, but NOT the project from the hoop.
- Completely cover the placement stitch with the prepared fabric.
- Tape in place to secure.
- Return the hoop to the machine.

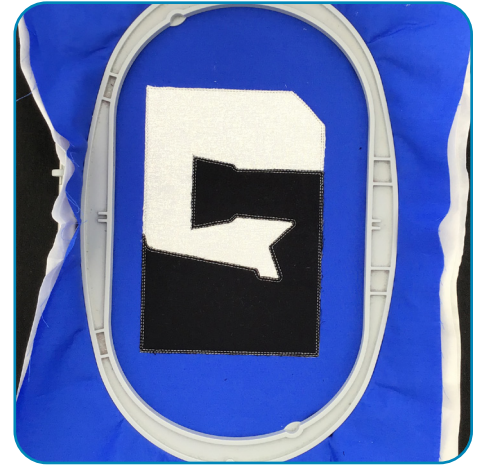

STEP 8

- Stitch Machine Step 4, Cut Line and Tackdown.

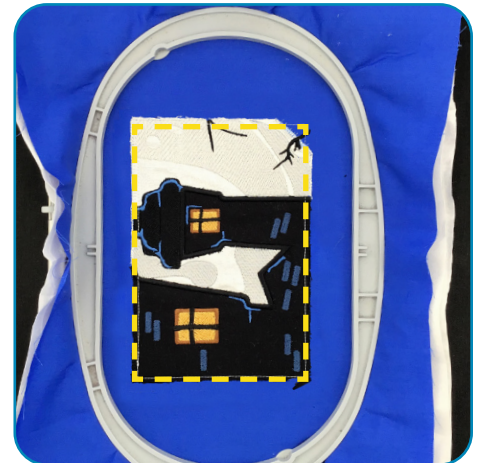

STEP 9

- Remove the hoop from the machine, but NOT the project from the hoop.
- Place on a flat surface.
- Trim the excess fabric as close to the cut line as possible.
- Note: If the outermost stitches (cut line) are cut, the inner stitches (tackdown) will hold the applique in place.

STEP 10

- Return the hoop to the machine and stitch the remaining steps per the thread chart, stopping before the last machine step.
- Before stitching the last machine step change the bobbin thread to a high contrast thread. Match the top thread to the background fabric.
- **Note: The last color change in each block is called "Seam".** This line is the guide when trimming and stitching the tiles together and needs to be highly visible on the back side of the tile. Stitch the top color in a thread that blends with the fabric or invisible thread.
- Use a color in the bobbin that contrasts sharply with the wrong side of the tile.
- Tip: Since the bobbin color does not have to be the same on each tile, this is a great time to use up partially wound bobbins.

TOP COVER

- Designs: 12901-06, 12901-10, 12901-11, 12901-14, 12901-15, 12901-17, 12901-20, 12901-21, 12901-24, 12901-25, 12901-28

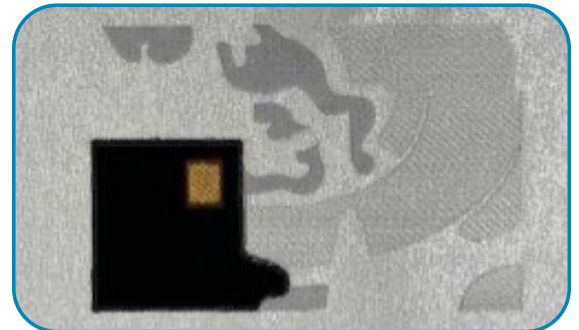

STEP 11

- Cut the black top cover sheet in half to yield (2) 8" x 4.5" rectangles of the top cover.

STEP 12

- Load selected design into the machine.
- Example design is 12901-11.
- Thread the machine per the thread chart.
- Place the hoop on the machine.
- Stitch the design per the thread chart. Follow the above applique instructions stopping before Machine Stitch 7, Black Detail Stitch.
- Note: In the example design, stop before Machine Step 7, Black Detail. The machine step number will vary by design.

STEP 13

- Remove the hoop from the machine.
- Place top cover over the tile area, completely covering the estimated location of the black detail stitching.
- Tape in place to secure.

TOP COVER

STEP 14

- Return the hoop to the machine.
- Stitch Machine Step 7, Black Detail Stitch.

STEP 15

- Remove the hoop from the machine.
- Tear away the excess top cover.
- Return the hoop to the machine and stitch the remaining machine steps, per the thread chart.
- Tip: Use tweezers to remove the excess top cover.

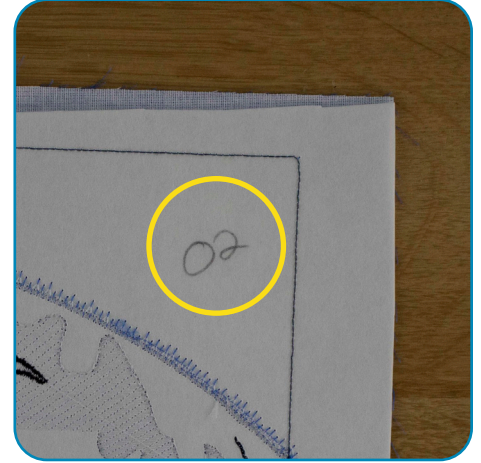

ASSEMBLY

STEP 16

- After the embroidery is complete, press each block right side down on a Perfect Embroidery Press Cloth.
- Write the number of the block on the back so it is easily identified during construction.
- Tip: Use a pen or pencil that will not bleed through to the front side.

STEP 17

- At the cutting mat, place the block right side down. Identify the "seam" stitch line. Trim 1/2" inch out from the seam stitch line on all four sides to create the seam allowance.
- Note: Accuracy will significantly facilitate the construction of the scene.

STEP 18

- Arrange the tiles in the layout for the scene.

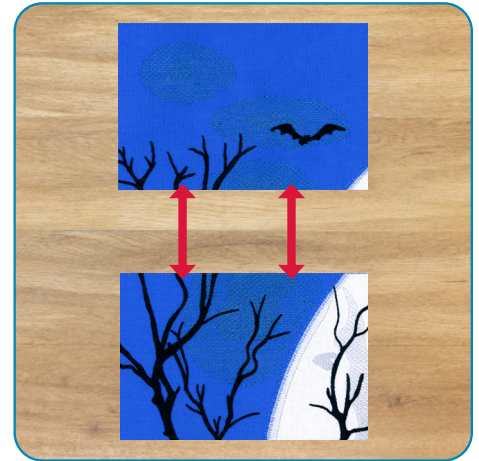

ASSEMBLY

STEP 19

- Stitch two adjacent tiles, right sides together; the bottom of one tile to the top of the one below it.
- Align the matching edges and stitch just inside of the seam line.
- Repeat until all the blocks have been paired.

STEP 20

- Press each seam open.
- Note: If the seams do not come apart easily, press both seam allowances to one side using steam and a cotton or linen setting.
- While warm, open the seam allowance with the large ball of the Expert Point and Press Tool.
- Press again and allow to cool.
- Once cool, remove the excess stabilizer in the seam allowance.
- Do not remove excess stabilizer from inside the seam line.

STEP 21

- Lay out the pressed tiles.
- Pair the connected tiles with the connected tiles to the right.

ASSEMBLY

STEP 22

- Align the center seams.
- Stitch just inside the seam line connecting all four blocks.
- Press seams open.
- Note: If the seams or major points of matching do not match up, try stitching that part first. Check for accuracy. Then stitch across the tiles.

STEP 23

- Finish connecting the block of tiles to the ones below. Press and remove stabilizer. Then continue the stitching and pressing process until the scene is completed.

FINISHING TOUCHES

STEP 24

- Cut batting and backing at least 2" larger than the tiling scene.
- Layer the backing (right side down), batting, and tiling scene (right side up).
- Center the tiling scene over the batting and backing.
- Spray baste all layers with temporary spray adhesive.

STEP 25

- Thread the sewing machine with a thread color that blends with the scene or invisible thread.
- Where the tiles connect, stitch in the ditch to attach the batting and backing to the top.
- Tip: For best results use a walking foot.

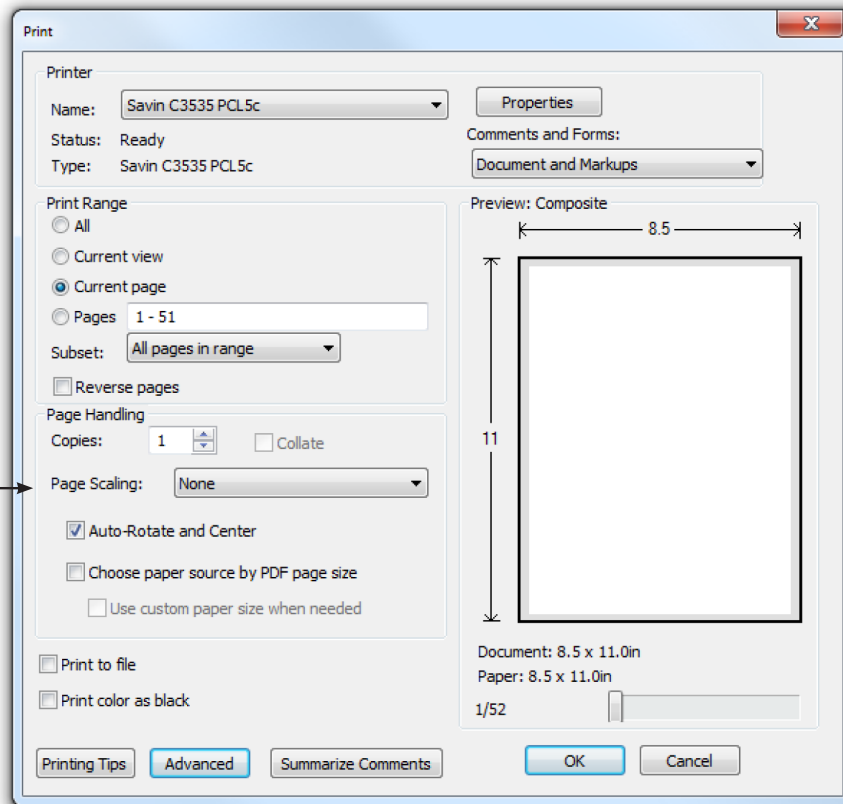

STEP 26

- Trim 1/4" from the edge, through all three layers, to square up the finished scene.
- Zigzag over the raw edges to join the edges together.
- Bind as desired.

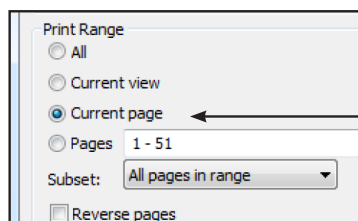

ATTENTION

When printing this document, any page scaling or page fitting options in your print dialog box must be turned OFF or set to NONE so that your files will print out at their actual size. Images not printed at actual size will not function as intended.

TO SAVE PAPER

Only print the desired image by navigating to the image's page, go to File > Print and select "Current page" in the print dialog box. Repeat for each desired image.
