Notes

The project includes freestanding applique designs and freestanding lace designs. All applique designs are stitched the same as shown in the instructions.

Design Mum Pumpkin Section 1 FSA (12928-01) is shown in the instructions.

All designs are stitched with matching thread in the top and bobbin.

Designs 12928-04, 12928-06, 12928-07, 12928-09, 12928-11, 12928-12, 12928-14, 12928-16 are freestanding lace. Follow the General Lace Instructions for these designs.

STEP 1

- Hoop one piece of AquaMesh and one piece of BadgeMaster in the hoop for all designs.

STEP 2

- Adhere two layers of StabilStick CutAway to the wrong side of all applique fabrics to provide stiffness to the finished structure.
Note: Each pumpkin requires six sections, six stems and one base.

ASSEMBLY

STEP 3

- Stitch Machine Step 1, Purple Fabric Placement Stitch.

STEP 4

- Remove the hoop from the machine, but NOT the project from the hoop. Place the hoop on a flat surface.
- Cut a piece of prepared fabric slightly larger than the placement line.
- Cover the placement line completely with the prepared fabric.
- Tape in place to secure.
- Note: If using the pre-cut applique with fuse and fix method place pre-cut fabric here, right side up.

STEP 5

- Return the hoop to the machine.
- Stitch Machine Step 2, Cut Line and Tackdown.

ASSEMBLY

STEP 6

- Remove the hoop from the machine, but NOT the project from the hoop. Place the hoop on a flat surface.
- Trim the excess fabric as close to the cut line as possible. If the outermost stitches (cut line) are cut, the inner stitches (tackdown) will hold the applique in place.
- Tip: If the AquaMesh is cut or a hole is created while trimming the fabric, use OESD Expert Embroidery Tape WashAway as a patch.

STEP 7

- Return the hoop to the machine and stitch the remaining machine steps, according to the thread chart.
- Remember to match the bobbin thread to the upper thread colors.

STEP 8

- When design is complete, remove the project from the hoop and trim the stabilizer 1/4" - 1/2" outside the design.

ASSEMBLY

STEP 9

- Rinse each piece in warm running water until the design is only slightly sticky.
- Lay face down on a non-stick surface to dry. Parchment paper or a cooling rack work well. This prevents the piece from curling.

STEP 10

- Press each piece, right side down, on a Perfect Embroidery Press Cloth.

STEP 11

- Use the OESD Punch Tool fitted with the 3mm tip to create the eyelets indicated in the Punch Tool guides located on pg. 23.

STEP 12

- With the right side facing up, attach Mum Pumpkin Section 1 FSA (12928-01) to Mum Pumpkin Stem FSL (12928-04) pulling the buttonettes through the eyelets using alligator clamps.
- Repeat this process for the remaining pumpkin sections and stems.

STEP 13

- Arrange the pumpkin sections so they are in order 01, 02, 03, 01, 02, 03.

STEP 14

- Attach the bottom of each section to the Mum Pumpkin Base FSA (12928-05) by inserting the buttonettes from the base into the eyelets of the pumpkin section.

STEP 15

- Once the sections are attached to the base, attach each neighboring section.

STEP 16

- When the sections are completely attached, attach each stem to its neighbor.

STEP 17

- Attach Mum Pumpkin Leaf FSL (12928-06) by pulling the buttonette through one of the eyelets in the middle of a stem.
- Repeat step to attach the vine.

ASSEMBLY

FINISHING TOUCHES

- Add tea lights or pixie lights to create a glow.
- The pumpkin is complete. Enjoy!

Stabilizer

- OESD AquaMesh
- OESD BadgeMaster

Notions/Tools

- 80/12 Embroidery Ballpoint Titanium needle for extended needle life
- OESD Alligator Clamps
- OESD Button Clips
- OESD Perfect Point and Press Tool

Isacord Thread Colors

- All OESD designs are digitized with Isacord 40 wt. polyester thread as the top thread and in the bobbin.
- Refer to the thread chart for color specifications.
- Match bobbin thread color to the top thread.

Instructions

Step 1 - Hoop

For FSL structures, hoop one layer of OESD AquaMesh and one layer of OESD BadgeMaster. BadgeMaster contains more starch so, combined with the AquaMesh, the lace is more rigid. For other FSL, where a softer lace is desired, hoop two layers of AquaMesh.

Step 2 - Embroider

Stitch the design per the thread chart with matching thread in the bobbin at each color change. When complete, remove from the hoop and trim away excess stabilizer about 1/4"-1/2" from the stitching.

Step 3 - Rinse

Rinse remaining stabilizer out in warm running water. For stiffer lace and FSL structures, DO NOT rinse away all of the stabilizer. The lace should be just slightly tacky. For softer lace, rinse until all traces of the stabilizer are removed.

Step 4 - Dry

Lay right side down flat on a non-stick surface, such as a cooling rack, parchment paper or Teflon sheet. This minimizes the tendency for the lace to curl. Let the pieces dry completely before proceeding with any assembly.

Step 5 - Press

Once completely dry, press right side down on a OESD Perfect Embroidery Press Cloth.

Step 6 - Assemble Structure

Note: Specific assembly instructions for a design/collection may be found in the thread chart pdf following the individual design color charts.

Lace must be COMPLETELY DRY before assembly. Wetting the buttonettes or eyelets to assemble is not recommended and may result in them stretching and coming "unbuttoned" when dry.

Use a pair of OESD Alligator Clamps to insert the buttonettes into the eyelets. Insert the tip of the OESD Alligator Clamps into the eyelet, grasp the buttonette and pull through the eyelet. Alternatively, use a stiletto or tweezers to push the buttonette through the eyelet.

Helpful Tips

Limp Lace

If the design is not stiff enough, press the lace pieces on the wrong side while applying spray starch. After ironing, spray again with starch and allow to dry completely. This will stiffen the lace pieces nicely and aid in construction. Or easily re-stiffen by diluting some stabilizer scraps in water (or use liquid starch) and dipping the item in the solution. Lay flat to dry.

Eyelets Too Small

If any of the eyelets appear closed or too small to penetrate with Alligator Clamps, they may be stretched by inserting the small end of the OESD Perfect Point and Press Tool into the eyelet opening and stretching it open wide enough to accommodate the OESD Alligator Clamps.

Button Clips

During the assembly process, some structures pull on buttonettes that have already been inserted and could pull them out altogether. Putting a Button Clip on the assembled buttonette will keep it in position during the assembly process. Remove the Button Clips when the assembly is complete.

Alternative Construction Option

In some cases, the buttonettes may be pulled to the inside of a project, instead of being visible on the outside. Insert the OESD Alligator Clamps through the eyelet from the wrong, or inside, of the lace and grasp the corresponding buttonette. Pull the buttonette to the wrong side of the lace. Pulling the buttonettes to the inside may cause stress on the ones already done. Button clips may be placed on the completed buttonette(s) to prevent them from pulling out of the eyelet during construction.
