General Instructions

The freestanding applique instructions, included in the collection, are general instructions. For demonstration purposes, a sample design that best demonstrates the technique is shown.

Fabric and thread requirements will vary by design, but the general technique is the same.

All designs are stitched with matching thread, top and bobbin.

The sample design is 12906-31 and 12906-32 from Home for the Holiday, Freestanding Houses.

Note: Some thread colors in instructions have been changed or digitally enhanced for better visibility.

□ Step 1

- Hoop one layer of AquaMesh and one layer of BadgeMaster for all designs.

□ Step 2

- Adhere one layer of StabilStick CutAway to the wrong side of all applique fabrics, to provide stiffness to the finished structure.
- Note: The structure interior is finished with white interior lining fabric. Since this is a double-sided applique only one layer per fabric is needed to provide stiffness to the structure.

EMBROIDERY

□ Step 3

- Load selected design into the machine.
- Example design is 12906-31.
- Thread the machine per the thread chart.
- Stitch Machine Step 1, Blue Front/White Back Fabric Placement Stitch.

□ Step 4

- Remove the hoop from the machine, but NOT the project from the hoop.
- Place the hoop on a flat surface.
- Completely cover the placement stitch with the prepared fabric.
- Tape in place to secure.

□ Step 5

- Turn the hoop over and place the white interior lining fabric, right side up, completely covering the placement stitch.
- Carefully tape to secure. Avoid pushing too hard on the stabilizer to prevent it from dislodging from the hoop.

EMBROIDERY

Step 6

- Return the hoop to the machine.
- Stitch Machine Step 2, Cut Line and Tackdown.

Step 7

- Remove the hoop from the machine, but NOT the project from the hoop.
- Trim the excess exterior blue fabric as close to the cut line as possible. If the outermost stitches (cut line) are cut, the inner stitches (tackdown) will hold the applique in place.
- Tip: If the AquaMesh is cut or a hole is created while trimming the fabric, use OESD Expert Embroidery Tape WashAway as a patch.

EMBROIDERY

Step 8

- Turn the hoop over and trim the excess white interior lining fabric as close to the cut line as possible.
- Tip: Avoid pushing too hard when trimming the stabilizer to prevent the stabilizer from dislodging from the hoop.

Step 9

- Return the hoop to the machine and stitch the remaining machine steps, according to the thread chart.
- Match the bobbin thread to the upper thread throughout.

Step 10

- When the design is complete, remove the project from the hoop and trim the stabilizer 1/4" - 1/2" outside the design.
- Rinse each piece in warm running water until the design is only slightly tacky.
- Lay right side down on a non-stick surface to dry. Parchment paper or a cooling rack work well to prevent curling. Dry completely.
- Once dry, press right side down on a Perfect Embroidery Press Cloth.

ASSEMBLY

□ Step 11

- Choose the tree upper and the corresponding tree bottom style.
- The Tree Section 1 FSA (32184-01) with the open end on the lower half is the tree top.
- The Tree Section 2 FSA (32184-02) with the open end on the upper half is the tree bottom.

□ Step 12

- Slide the top of the tree (32184-01) into the open end of the lower part of the tree (32184-02).

□ Step 13

- The project is complete. Enjoy!
