EMBROIDERY

General Instructions

The freestanding applique instructions, included in the collection, are general instructions. For demonstration purposes, a sample design that best demonstrates the technique is shown. Fabric and thread requirements will vary by design, but the general technique is the same

All designs are stitched with matching thread, top and bobbin.

Note: Some thread colors in instructions have been changed or digitally enhanced for better visibility.

☐ Step 1

- Hoop one layer of AquaMesh and one layer of BadgeMaster for all designs.

☐ Step 2

- Adhere one layer of StabilStick CutAway to the wrong side of all applique fabrics, to provide stiffness to the finished structure.
- Note: Since this is a double-sided applique only 1 layer per fabric is needed to provide stiffness to the structure.

☐ Step 3

- Load selected design into the machine.
- Example design is Medium Turkey FSA (51282-09).
- Thread the machine per the thread chart.
- Stitch Machine Step 1, Front and Back Tan Fabric Placement Stitch.
☐ Step 4

- Remove the hoop from the machine, but NOT the project from the hoop.
- Lay the hoop on a flat surface.
- Completely cover the placement stitch with the prepared fabric.
- Tape in place to secure.
☐ Step 5

- Turn the hoop over and place the fabric, right side up, completely covering the placement stitch.
- Carefully tape to secure. Avoid pushing too hard on the stabilizer to prevent it from dislodging from the hoop.

BACK OF HOOP

EMBROIDERY

☐ Step 6

- Return the hoop to the machine.
- Stitch Machine Step 2, Cut Line and Tackdown.
☐ Step 7

- Remove the hoop from the machine, but NOT the project from the hoop.
- Trim the excess fabric as close to the cut line as possible. If the outermost stitches (cut line) are cut, the inner stitches (tackdown) will still hold the applique in place.
- Tip: If the AquaMesh is cut or a hole is created while trimming the fabric, use OESD Expert Embroidery Tape WashAway or AquaMesh Plus as a patch.

☐ Step 8

- Turn the hoop over and trim the excess fabric as close to the cut line as possible.

BACK OF HOOP

☐ Step 9

- Return the hoop to the machine.
- Stitch Machine Step 3, Front and back Brown Fabric Placement Stitch.

☐ Step 10

- Remove the hoop from the machine, but NOT the project from the hoop.
- Lay the hoop on a flat surface.
- Completely cover the placement stitch with the prepared fabric.
- Tape in place to secure.

☐ Step 11

- Turn the hoop over and place the fabric, right side up, completely covering the placement stitch.
- Carefully tape to secure. Avoid pushing too hard on the stabilizer to prevent it from dislodging from the hoop.

BACK OF HOOP

☐ Step 12

- Return the hoop to the machine.
- Stitch Machine Step 4, Cut Line and Tackdown.

☐ Step 13

- Remove the hoop from the machine, but NOT the project from the hoop.
- Trim the excess fabric as close to the cut line as possible.
- Tip: If the AquaMesh is cut or a hole is created while trimming the fabric, use OESD Expert Embroidery Tape WashAway as a patch.

☐ Step 14

- Turn the hoop over and trim the excess fabric as close to the cut line as possible.

BACK OF HOOP

☐ Step 15

- Return the hoop to the machine and stitch the remaining machine steps, per the thread chart.
- Match the bobbin thread to the upper thread throughout.

☐ Card Embroidery - Step 16

- Create the place card following the previous instructions.
- Before removing from the hoop, use the built-in fonts and placement tools on your machine, insert text at this step.
- Note: A permanent fabric marker could be used to personalize the place card.
- Tip: Test any permanent fabric marker on scrap fabric before use.

ASSEMBLY

☐ Step 17

- When the design is complete, remove the project from the hoop and trim the stabilizer 1/4"- 1/2" outside the design.
- Rinse each piece in warm running water until the design is only slightly tacky.
- Lay right side down on a non-stick surface to dry. Parchment paper or a cooling rack work well to prevent curling. Dry completely.

☐ Step 18

- Once dry, press right side down on a Perfect Embroidery Press Cloth.

☐ Step 19

- Before assembly, use a utility knife and cut through all the layers of the assembly slots. Take care to not cut the satin stitching. For the best fit, make two passes through the slots with the blade to create a small gap. A complete cutting guide is available on page 33 of the instructions.

☐ Step 20

- Start assembly by folding the stand (either 51282-15 or 51282-16) at the hinge as shown. (51282-15 shown in photo)

☐ Step 21

- Slide the right slot of Medium Feathers 4 FSA (51282-13) into the back right slot of Medium Card Stand FSA (51282-15.)

Step 22

- Repeat the previous step for the other side.

Step 23

- Slide the right slot of Medium Feathers 3 FSA (51282-12) into the back right slot of Medium Card Stand FSA (51282-15).

Step 24

- Repeat the previous step for the other side.

☐ Step 25

- Slide the right slot of Medium Feathers 2 FSA (51282-11) into the back right slot of Medium Card Stand FSA (51282-15).

☐ Step 26

- Repeat the previous step for the other side.

☐ Step 27

- Slide the right slot of Medium Feathers 1 FSA (51282-10) into the back right slot of Medium Card Stand FSA (51282-15).

☐ Step 28

• Repeat the previous step for the other side.

☐ Step 29

• Slide the right slot of Medium Turkey FSA (51282-09) into the back right slot of Medium Card Stand FSA (51282-15).
☐ Step 30

• Repeat the previous step for the other side.

Step 31

- Place Medium Blank Card FSA (51282-16) on the two remaining slots on the front of the assembly.

Step 32

- Your design is now complete, enjoy!

GENERAL FREESTANDING LACE GUIDE

Scissortail STITCHES

Stabilizer

- OESD AquaMesh
- OESD BadgeMaster

Notion/Tools

- 80/12 Embroidery Ballpoint Titanium needle for extended needle life
- OESD Alligator Clamps
- OESD Button Clips
- OESD Perfect Point and Press Tool

Isacord Thread Colors

- All OESD designs are digitized with Isacord 40 wt. polyester thread as the top thread and in the bobbin.
- Refer to the thread chart for color specifications.
- Match bobbin thread color to the top thread.

Instructions

Step 1 - Hoop
For FSL structures, hoop one layer of OESD AquaMesh and one layer of OESD BadgeMaster. BadgeMaster contains more starch so, combined with the AquaMesh, the lace is more rigid.
For other FSL, where a softer lace is desired, hoop two layers of AquaMesh.

Step 2 - Embroider
Stitch the design per the thread chart with matching thread in the bobbin at each color change.
When complete, remove from the hoop and trim away excess stabilizer about 1/4"-1/2" from the stitching.

Step 3 - Rinse
Rinse remaining stabilizer out in warm running water.
For stiffer lace and FSL structures, DO NOT rinse away all of the stabilizer. The lace should be just slightly tacky.
For softer lace, rinse until all traces of the stabilizer is removed.

Step 4 - Dry
Lay right side down flat on a non-stick surface, such as a cookie rack, parchment paper or Teflon sheet. This minimizes the tendency for the lace to curl.
Let the pieces dry completely before proceeding with any assembly.

Step 5 - Press
Once completely dry, press right side down on a OESD Perfect Embroidery Press Cloth.

Step 6 – Assemble Structure
Note: Specific assembly instructions for a design/collection may be found in the thread chart pdf following the individual design color charts.
Lace must be COMPLETELY DRY before assembly. Wetting the buttonettes or eyelets to assemble is not recommended and may result in them stretching and coming "unbuttoned" when dry.
Use a pair of OESD Alligator Clamps to insert the buttonettes into the eyelets. Insert the tip of the OESD Alligator Clamps into the eyelet, grasp the buttonette and pull through the eyelet. Alternatively, use a stiletto or tweezers to push the buttonette through the eyelet.

Helpful Tips

Limp Lace
If the design is not stiff enough, press the lace pieces on the wrong side while applying spray starch. After ironing, spray again with starch and allow to dry completely. This will stiffen the lace pieces nicely and aid in construction. Or easily re-stiffen by diluting some stabilizer scraps in water (or use liquid starch) and dipping the item in the solution. Lay flat to dry.

Eyelets Too Small
If any of the eyelets appear closed or too small to penetrate with Alligator Clamps, they may be stretched by inserting the small end of the OESD Perfect Point and Press Tool into the eyelet opening and stretching it open wide enough to accommodate the OESD Alligator Clamps.

Button Clips
During the assembly process, some structures pull on buttonettes that have already been inserted and could pull them out altogether.
Putting a Button Clip on the assembled buttonette will keep it in position during the assembly process.
Remove the Button Clips when the assembly is complete.

Alternative Construction Option
In some cases, the buttonettes may be pulled to the inside of a project, instead of being visible on the outside.
Insert the OESD Alligator Clamps through the eyelet from the wrong, or inside, of the lace and grasp the corresponding buttonette. Pull the buttonette to the wrong side of the lace.
Pulling the buttonettes to the inside may cause stress on the ones already done. Button clips may be place on the completed buttonette(s) to prevent them from pulling out of the eyelet.

PRINTING INSTRUCTIONS

ATTENTION

When printing this document, any page scaling or page fitting options in your print dialog box must be turned OFF or set to NONE so that your files will print out at their actual size. Images not printed at actual size will not function as intended.

TO SAVE PAPER

Only print the desired image by navigating to the image's page, go to File > Print and select "Current page" in the print dialog box. Repeat for each desired image.

Print at 100%. No scaling. This box measures 1" x 1". Use the box as an accuracy guide when printing templates.
