CUT IN PLACE APPLIQUÉ

1. Print out the necessary pages from the PDF of the appliqué pattern(s).
2. Mark the right side of the pattern pieces so you'll know which direction to lay the pattern on the fabric.
3. Lightly spray the wrong side of the pattern pieces with temporary adhesive spray and allow it to set for a few minutes.
4. Place the pattern pieces on the right side of the fabric and carefully cut them out. **PHOTO 1**
5. Sew the placement stitch on you hooped fabric. **PHOTO 2**
6. With the paper still stuck to the right side of the appliqué fabric, spray the wrong side of the fabric with temporary spray adhesive.
7. Place the fabric inside the sewing placement stitch so that it matches the stitching line then remove the paper pattern. **PHOTO 3**
8. Sew the tackdown. **PHOTO 4**
9. Sew the remainder of the design and repeat for any remaining pieces. **PHOTO 5**

NOTE: The patterns are sized for the designs as they were made. If you resize the design, you will need to resize the pattern the same amount. You can print out the pattern at the normal size then copy it on a copy machine at the changed size, i.e. resize the designs to 80%, resize the printed pattern to 80%.

TIP: When Printing the patterns, make sure that the “Fit to page” option is **UNCHECKED** in the Print Dialog Box. If this option is checked the printed patterns will not be actual size.

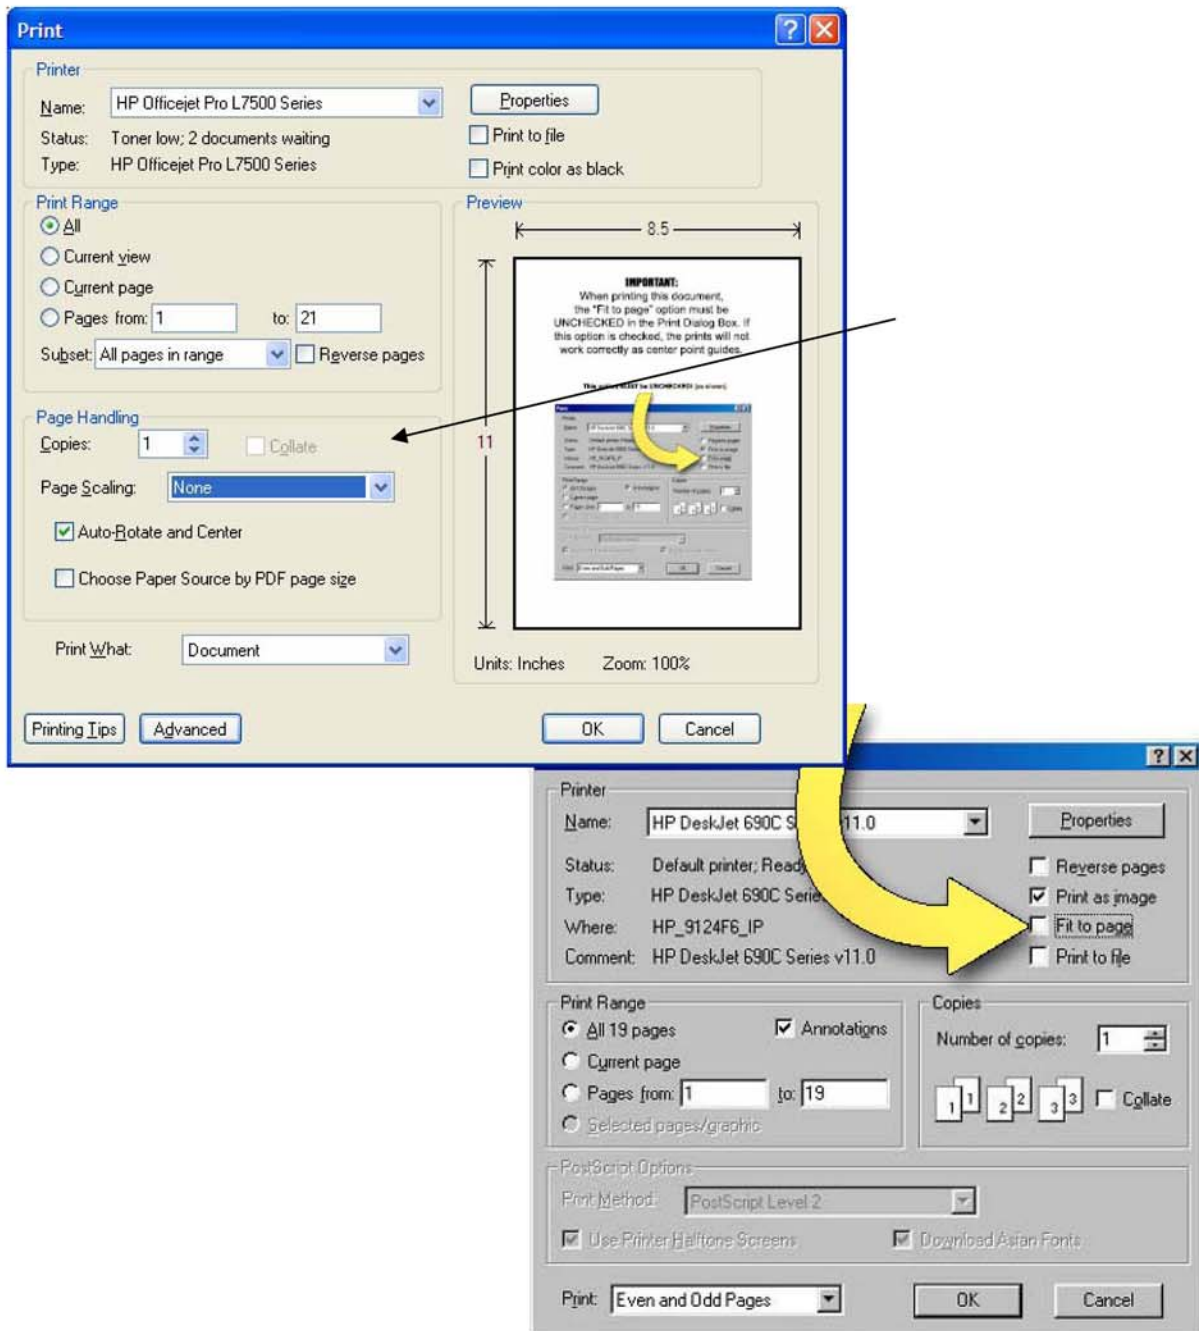

PRECUT APPLIQUÉ

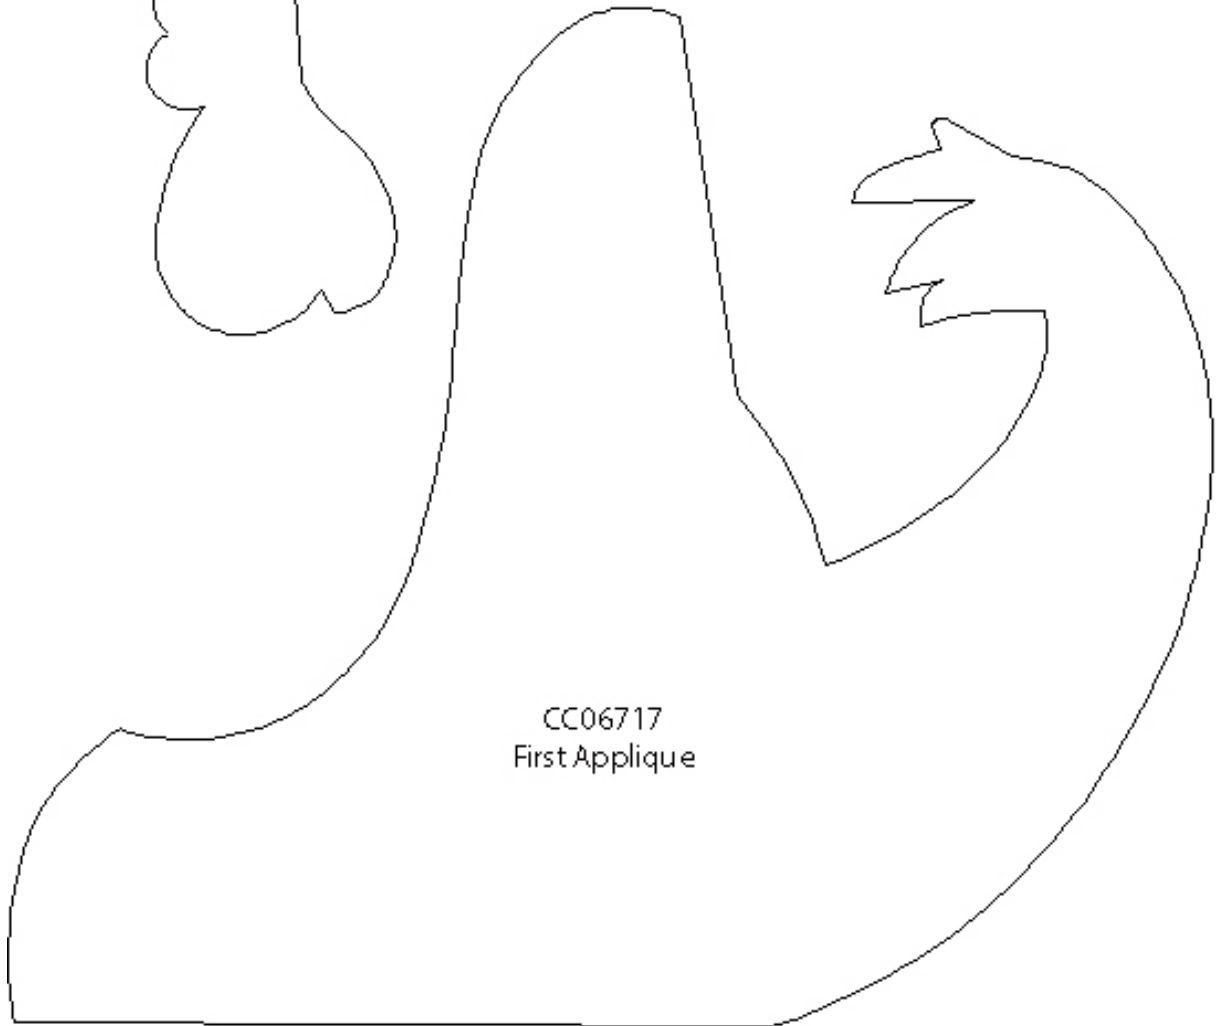

1. Hoop your fabric and backing.
2. Sew the pattern/placement. **PHOTO 1**
3. Place a piece of appliqué fabric over the pattern/placement so that it is completely covered.
4. Sew the trim stitch/tackdown.
5. Carefully cut away the excess appliqué fabric. **PHOTO 2**
6. Sew the remainder of the design and repeat for any remaining pieces. **PHOTO 3**

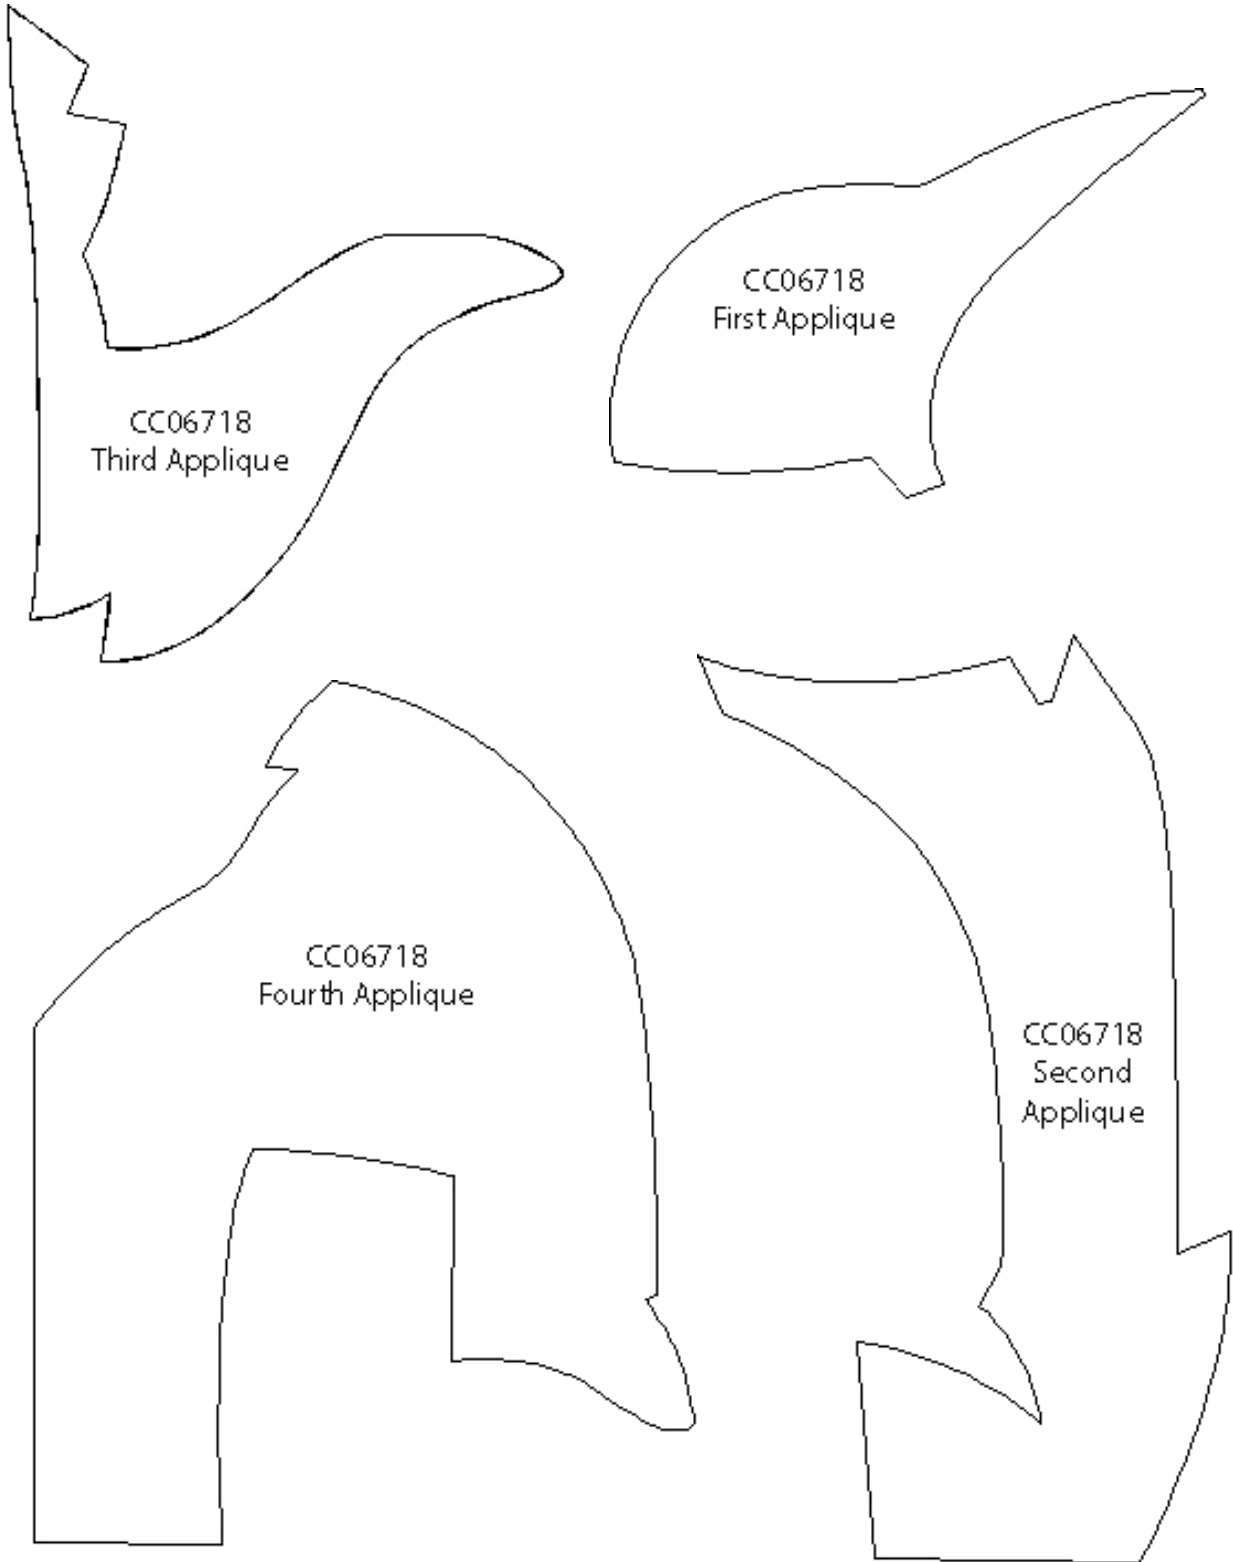

IMPORTANT:

When printing this document, the “Fit to page” option must be **UNCHECKED** or the “Page Scaling” option must be set to **NONE** depending on your printers options. If this option is set incorrectly, the prints will not work correctly as patterns because they will not print at actual size.

SUPPLIES

- Medium Weight Tear-Away Stabilizer
- (2) 5" squares of fabric for each coaster
- (1) 3 ½" square of Craft foam (available at most hobby & discount stores) for each coaster
- Temporary spray adhesive

INSTRUCTIONS FOR MAKING COASTERS

1. With temporary spray adhesive, adhere two layers of medium weight tear-away stabilizer together.
2. Hoop combined stabilizer.
3. Spray hooped stabilizer with temporary spray adhesive.
4. Sew 1st color (placement stitch).
5. Place 5" square of fabric in the center of the hoop making sure to completely cover the placement stitch.
6. Continue stitching design, stopping before the last color is sewn.
7. The final color change is the seam stitch that puts the front and back together. Place a second 5" square of fabric right side down on top of hoop and finish design.
8. Remove the hoop from the machine and the fabric from the hoop.
9. From the back side, trim close to 1/8" from placement stitch. Your trimmed coaster should be about 4" x 4.5". **PHOTO 1**
10. Trim corners close to stitching. **PHOTO 2**
11. Turn coaster right side out and use a blunt point such as a chopstick to push out the corners. Press from wrong side.
12. Insert the 3 ½" craft foam inside the coaster
13. Whip stitch the coaster closed or edge stitch around the entire coaster using your sewing machine.
