EMBROIDERY

STEP 1

- Prep all Applique fabrics with one layer of StabilStick TearAway.
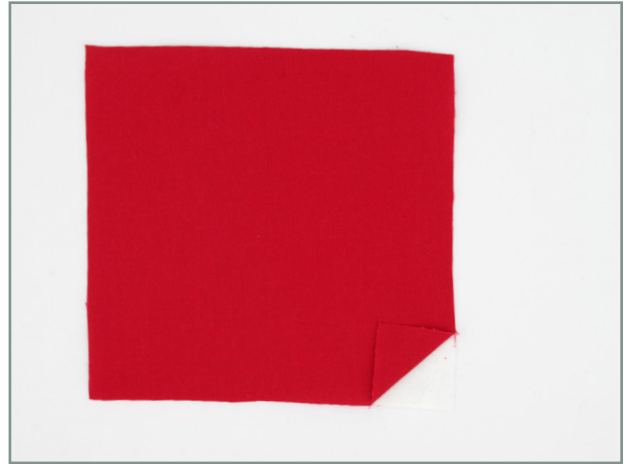

STEP 2

- Hoop desired fabric and stabilizer and stitch color 1, Red Fabric Placement Stitch.

STEP 3

- Lightly spray temporary adhesive to the back side of the applique fabric and place over the placement stitch, covering it completely. Stitch color 2, Cut Line and Tackdown.
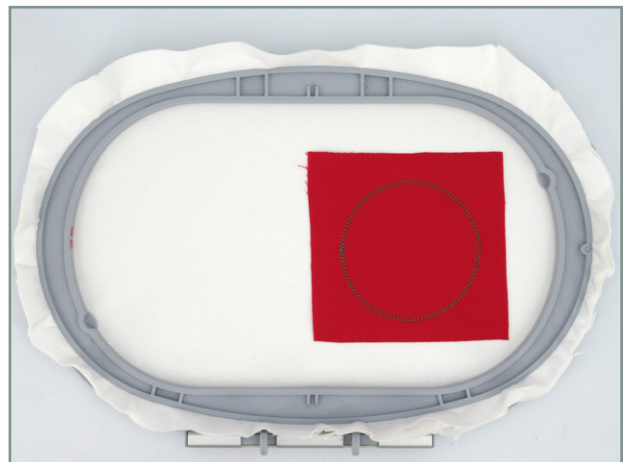

EMBROIDERY

STEP 4

- Remove the hoop from the machine and trim fabric along the cut line.
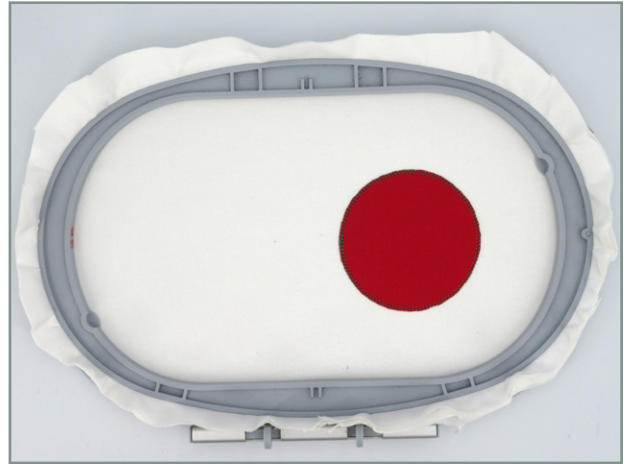

STEP 5

- Replace the hoop to the machine and repeat steps 2-4 for any remaining applique pieces. Continue to stitch out the remaining colors.
- **Note:** Trim between color changes or turn on auto trim machine functions.

OCTAGON TREE SKIRT

Decorating the Christmas tree isn't complete until it puts on a skirt! Tree skirts are the perfect canvas for showing off your embroidery skills. This project, featuring designs from Holiday Stitches, is a perfect way to dress up your tree. The whimsical stitches and fun colors give the project a modern aesthetic with a nod to traditional hand embroidery. With the help of Pinpoint Placement and large hoops, this is a quick project that requires minimal sewing skills. Enjoy this fun project you'll use for years to come.

PROJECT SUPPLIES

Isacord Thread Colors

Isacord threads per design chart

Stabilizer

- OESD Fusible Woven
- OESD Fuse and Fleece
- OESD StabilStick Template Sheet (optional)
- Heat2Go or StitcH2O topper (recommended)

Fabric/Notions

- 1 yard linen fabric (trimmed to 36" square)
- 1 yard backing fabric (trimmed to 36" square)
- OESD Expert Point and Press Tool (optional)
- Hoops to accommodate design sizes
- Fabric marker
- Ruler, minimum 15" long
- Fabric shears

Designs

- 82023-13 Christmas Lights size 6.15" x 4.18"
- 82023-25 Jumbo Holiday Wreath size 9.81" x 9.88"

INSTRUCTIONS

STEP 1

- Press top fabric with spray starch.
- Apply Fusible Woven to entire back of fabric according to package directions.
- Overlap Fusible Woven by 1/8" when necessary.

STEP 2

- Fold the fabric in half wrong sides together. Press the fold to make a crease.
- Fold in half again, making a square as shown in the diagram. Press the folds to make a crease.
- Take the top folded layer at the corner with two raw edges (top right in the diagram) and fold it to the opposite corner. Press the fold to crease.
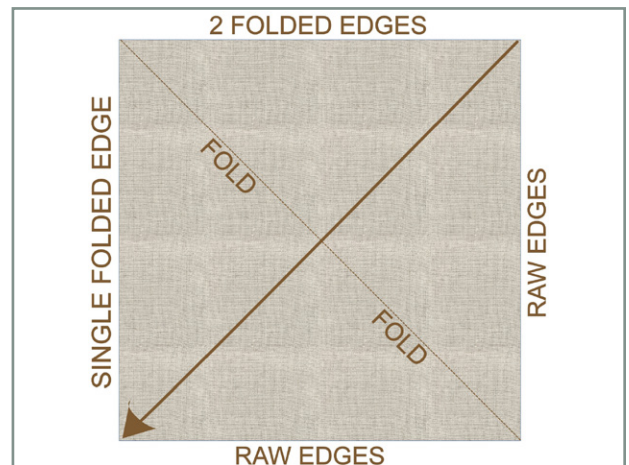

STEP 3

- Flip the fabric over to the other side and fold the remaining folded/raw edge corner together to the opposite corner. Press the fold to crease. This should result in one large triangle.
- The center point of the fabric should look like the image.

STEP 4

- From the center point measure down 15" on each fold. Mark as shown.

STEP 5

- Mark a line connecting the two points at the fold as shown.

STEP 6

- Repeat Steps 4 and 5 for each of the eight segments of the fabric. The lines should connect as shown.

INSTRUCTIONS

STEP 7

- Trim away the excess fabric in each section to create an octagon.
- For best results, trim one layer of fabric at a time.

STEP 8

- Cut strips of Fuse and Fleece stabilizer 32" long. The number of strips will depend on the width of the Fuse and Fleece.
- Apply the Fuse and Fleece to the back of the fabric following the package instructions.
- A Teflon pressing sheet may be helpful to avoid fusing the stabilizer to the ironing board.
- The Fuse and Fleece should extend beyond the edge of the fabric as shown. Do not trim away the excess. It will act as an extension of the fabric (like a lead cloth), if needed, when hooping.
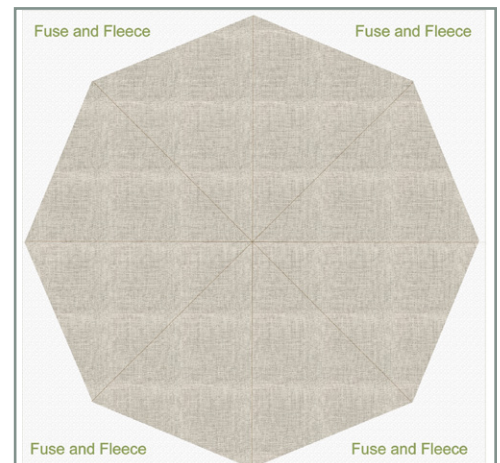

STEP 9

- Mark the center of the fabric with a cross-hair for placement of the center wreath design.
- Measure down each crease from the center crosshair 9" and mark a crosshair for the light string starting and ending points. The crosshair is where the designs will connect.
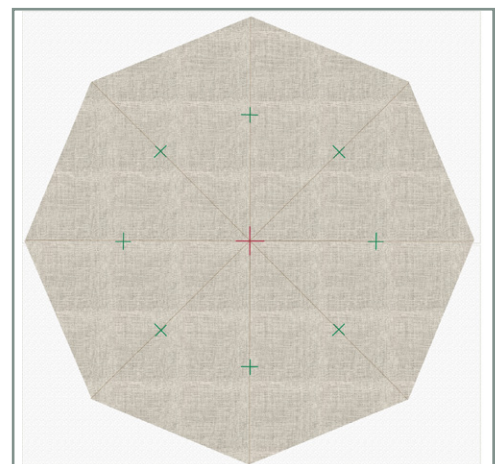

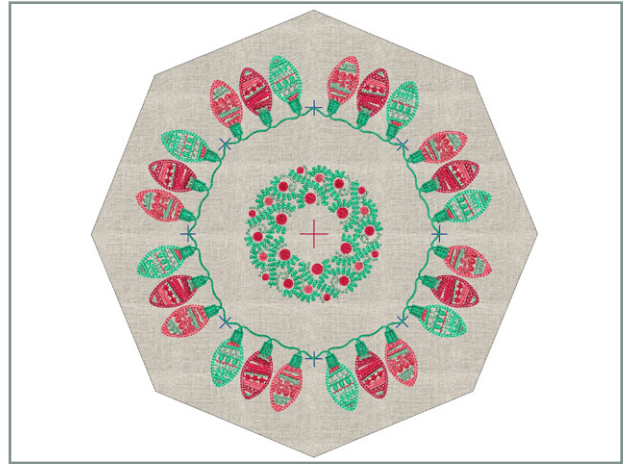

INSTRUCTIONS

STEP 10

- The image shows the placement of each design on the fabric with the marked crosshairs.

STEP 11

- Load the wreath design, 82023-25.
- Hoop the fabric with the center crosshair near the center of the hoop.
- Position the hoop so that the needle, when lowered, is in the center of the crosshair as shown.

STEP 12

- Cover the design area with topper and tape in place to hold.
- Stitch the design changing thread colors as required.
- When finished, remove the fabric from the hoop. Remove excess topping.

OESD™

STEP 13

- Load design 82023-13.
- If necessary, rotate the design to display as shown.
- Note – the following steps use the Pinpoint Placement feature of the Bernina Plus machines. If this feature is not available, skip to Addendum A.

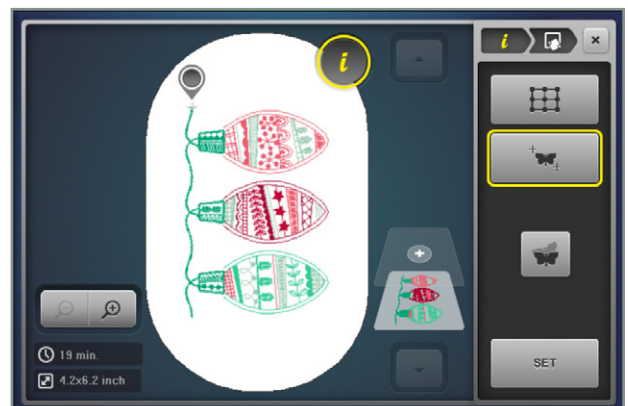

STEP 14

- Hoop the fabric to include two crosshairs close to the attachment side of the hoop as shown.
- Attach the hoop to the machine.

STEP 15

- In the information menu, select the Pinpoint Placement Icon.
- Select the Positioning Dots option.
- Touch the screen above the uppermost stitch of the design to designate the first positioning dot.
- Use the multi-function knobs to position top crosshair on the fabric directly under the needle. Drop the needle to check the accuracy. Adjust if necessary.
- Press the set button.

INSTRUCTIONS

STEP 16

- Touch the screen below the bottommost stitch of the design to designate the second positioning dot.
- Use the multi-function knobs to position bottom crosshair on the fabric directly under the needle. Drop the needle to check the accuracy. Adjust if necessary.
- Press the set button. Exit the Information Screen.
- Note – the Pinpoint Placement feature has resized the design to fit perfectly between the two crosshairs.
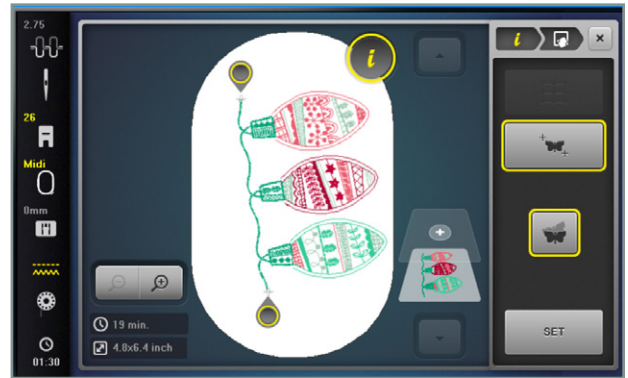

STEP 17

- Move from editing to stitching mode by touching the Needle Icon.
- Stitch the design changing colors as requested.
- When complete, remove the hoop from the machine and the fabric from the hoop.

STEP 18

- Repeat from Step 14 for the remaining designs with two exceptions.
- When connecting to the previous design, connect to the last stitch of the design instead of to the drawn crosshair as shown. This will ensure perfect, stitch-to-stitch alignment!
- On the last design, connect both points of the design to the stitches of the designs on either side.
- Want to save time? It is also possible to stitch two of the designs in one hooping with a Maxi, Mega or Jumbo hoop. Proceed to Addendum B.
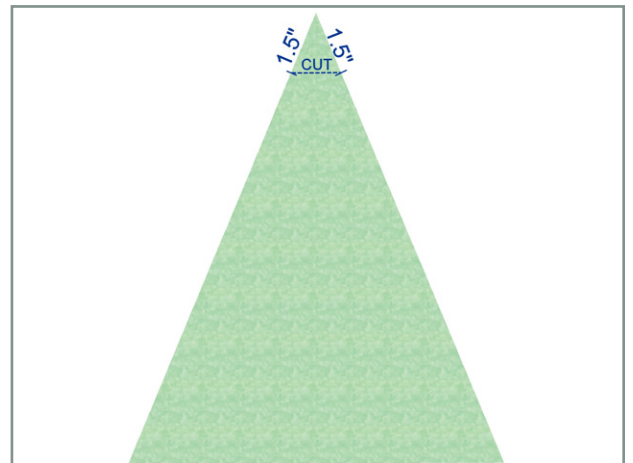

INSTRUCTIONS

STEP 19

- Press the embroidered fabric and remove all topper and crosshair marks.
- Trim away the excess Fuse and Fleece along the edge of the fabric as shown

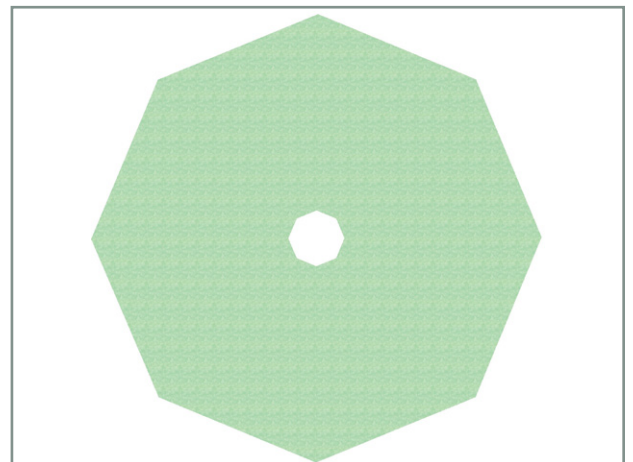

STEP 20

- Repeat Steps 2-7 for the backing fabric. Or, on a flat surface use the embroidered fabric as a pattern and trace around the edges onto the backing fabric. Trim away excess fabric.
- Fold the backing as described in step 2. (If it has already been trimmed, match the points of the octagon as it is folded.) Press folds to crease.
- Mark 1 1/2" from the center point on each crease. Cut point to point as shown. This creates an octagonal opening for the tree trunk.

STEP 21

- Press the backing. Lay the backing over the tree skirt, right sides together.
- Pin outer edges and inner opening.

OESD™

STEP 22

- Stitch the inner opening using a ¼" seam allowance.
- Stitch the outer edges with a ¼" seam allowance.

STEP 23

- On the wrong side of the skirt front, mark a line from the center of the skirt to the outer edge Using the junctions of the designs and the previously pressed creases as a guide.

STEP 24

- Stitch 1/8" away from the drawn line on one side.
- On the other side, stitch 1/8" away from the drawn line but leave a large opening for turning the skirt right side out. For best results, backstitch on each side of the opening.

STEP 25

- Cut apart the tree skirt on the drawn line.
- Trim fabric in center to ¼". Clip into each inner corner. Trim each outer corner to remove bulk.
- Turn tree skirt right side out. Use the Expert Point and Press Tool to facilitate turning corners and points. Press.
- Press under seam allowance on both sides of the opening. Secure with hand stitching or fuse.
- Add ribbon or the closure of your choice to hold the opening together when used.

STEP A1   Addendum A: Instructions without Pinpoint Placement

- Increase the size of the design proportionally to 112%. Print a template of the design onto a StabilStick Template Sheet. Trim template.
- Position the template so the upper and lower ends meet at their crosshairs.

STEP A2

- Hoop the fabric with the template in place.

INSTRUCTIONS

STEP A3

- Use the template crosshair to position the hoop under the needle.
- Rotate if necessary.
- Remove the template! Stitch the design.
- Note – The template may be reused for each hooping.
- Repeat for all eight designs.
- Return to Step 19 for completion instructions.

STEP B1   Addendum B: Multiple Design Embroidery

- **Optional**
- Orient the design as shown in the image in Step 13.
- In the Information Menu, select Duplicate. Two designs are now displayed on the screen and the second one is selected.
- Select the Rotate Icon. Using the Multifunction knobs, rotate that design 45° as shown.
- Move the rotated design down to connect with the original design at its bottommost point. Use the zoom in feature to verify placement. Zoom back out.
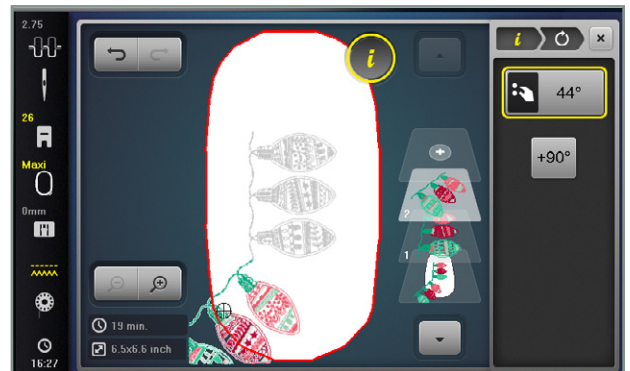

STEP B2

- Select both designs by clicking on the bottom layer.
- Select the Rotate icon. Rotate the design -22°.
- Move the rotated design back into the sewing area of the hoop as shown.
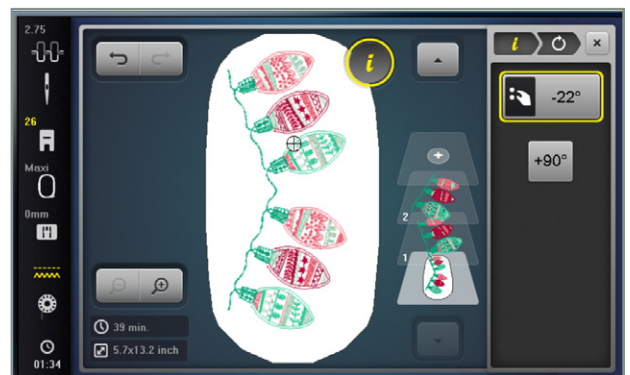

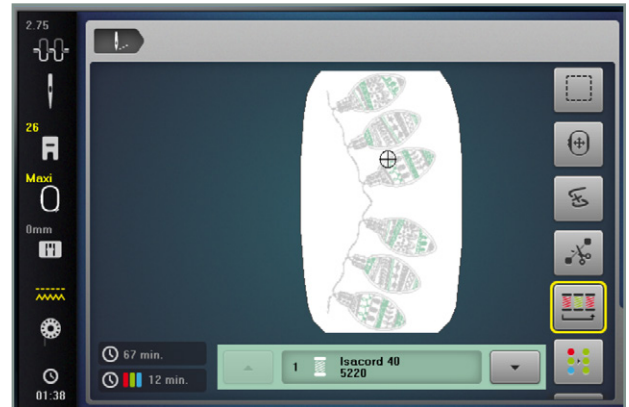

INSTRUCTIONS

STEP B3

- Exit the information menu and select the needle to move to stitching mode.
- To save time in thread changes, click on the Color Resequence icon (highlighted) to combine colors

STEP B4

- When hooping the fabric, include three of the crosshairs as shown.
- When positioning the designs with Pinpoint Placement, still select the uppermost and bottommost points to align with their respective crosshairs.
- Return to Step 19 for completion Instructions.
