

Product Usage Instructions

Fuse and Fleece

- Make sure the fabric being used can be ironed with steam. If you are unsure, test on a scrap of the fabric or in an inconspicuous area before proceeding.
- Use a steam iron to bond the fleece to the back of the fabric.
- May be used alone on firmly woven fabrics as a stabilizer for low stitch count embroidery designs.
- May be used layered with a tear away or cut away stabilizer for higher stitch count designs.
- If using multiple layers of Fuse and Fleece, press one layer to the back of the project, then press the next layer to the back of first layer.
