

Product Usage Instructions

Light Weight TearAway Stabilizer

- Cut the Light Weight TearAway stabilizer approximately 2" larger than your hoop.
- Spray the stabilizer with temporary spray adhesive. If using multiple layers of stabilizer, adhere all layers together.
- On the wrong side of the item, place the prepared stabilizer over the design area and smooth into place.
- Hoop the item (right side up).
- Embroider the item.

REMOVAL INSTRUCTIONS:

- Remove your embroidered item from the hoop.
- Hold the embroidered item with the stabilizer side up.
- Tear the stabilizer carefully away from the embroidery, supporting the embroidery stitches with your thumb and finger so as not to distort the embroidery.
- If multiple layers were used, remove each layer separately.
