

Product Usage Instructions

Heavy Weight TearAway Stabilizer

- Cut a piece of Heavy Weight TearAway stabilizer about 2" larger than the hoop.
- Lightly spray the Heavy Weight TearAway with temporary spray adhesive.
- Position the Heavy Weight TearAway on the wrong side of the item to be embroidered and gently smooth into place.
- Hoop the item to be embroidered without stretching or pulling in the hoop.
- May be combined with other stabilizers for additional support in stitch intensive designs.
- Embroider the item.

REMOVAL INSTRUCTIONS:

- Remove your embroidered item from the hoop.
- Lay the embroidered item on a hard, flat surface with the stabilizer side up.
- Tear the stabilizer carefully away from the embroidery, supporting the embroidery stitches with thumb and finger to avoid distorting the embroidery or tearing out fragile stitches.
- For best results, leave stabilizer in open areas for continued support.
