General Instructions

The instructions, included in the collection, are general instructions. For demonstration purposes, a sample design that best demonstrates the technique is shown. Designs 13016-01 and 13016-12 are shown here. Fabric and thread requirements will vary by design, but the general technique is the same. Applique techniques shown are pre-cut (tags) and cut in place (pouches). Pre-cut applique patterns are included at the end of the instructions.

Note: Some thread colors in the instructions have been changed or digitally enhanced for better visibility.

- Place the gift tag within the placement stitching.
- Turn the hoop over.
- Finger press to secure.
- **Tip: To ensure the gift tag back matches the gift tag front placement, hold the hoop up to the light.**

Step 31

- Return the hoop to the machine.
- Stitch Machine Step 7, Back Tag Tackdown with matching bobbin thread.

Step 32

- When the design is complete, remove the project from the hoop.

General Instructions

The greeting card and freestanding applique (FSA) instructions, included in the collection, are general instructions. For demonstration purposes, a sample design that best demonstrates the technique is shown. Designs 13017-15, 13017-01 and 13017-07 are shown here. Fabric and thread requirements will vary by design, but the general technique is the same. Applique techniques shown are pre-cut (greeting card background fabric) and cut in place (all other fabrics & vinyl). Pre-cut applique patterns are included at the end of the instructions.

Note: Some thread colors in the instructions have been changed or digitally enhanced for better visibility.

- OESD BadgeMaster

Notion/Tools

- 80/12 Embroidery Ballpoint Titanium needle for extended needle life
- OESD Alligator Clamps
- OESD Button Clips
- OESD Perfect Point and Press Tool

Isacord Thread Colors

- All OESD designs are digitized with Isacord 40 wt. polyester thread as the top thread and in the bobbin.
- Refer to the thread chart for color specifications.
- Match bobbin thread color to the top thread.

Instructions

Step 1 - Hoop

For FSL structures, hoop one layer of OESD AquaMesh and one layer of OESD BadgeMaster. BadgeMaster contains more starch so, combined with the AquaMesh, the lace is more rigid.

For other FSL, where a softer lace is desired, hoop two layers of AquaMesh.

Step 2 - Embroider

Stitch the design per the thread chart with matching thread in the bobbin at each color change.

When complete, remove from the hoop and trim away excess stabilizer about 1/4"-1/2" from the stitching.

Step 3 - Rinse

Rinse remaining stabilizer out in warm running water.

For stiffer lace and FSL structures, DO NOT rinse away all of the stabilizer. The lace should be just slightly tacky.

For softer lace, rinse until all traces of the stabilizer is removed.

Step 4 - Dry

Lay right side down flat on a non-stick surface, such as a cookie rack, parchment paper or Teflon sheet. This minimizes the tendency for the lace to curl.

Let the pieces dry completely before proceeding with any assembly.

Step 5 - Press

Once completely dry, press right side down on a OESD Perfect Embroidery Press Cloth.

Step 6 - Assemble Structure

Note: Specific assembly instructions for a design/collection may be found in the thread chart pdf following the individual design color charts.

Lace must be COMPLETELY DRY before assembly. Wetting the buttonettes or eyelets to assemble is not recommended and may result in them stretching and coming "unbuttoned" when dry.

Use a pair of OESD Alligator Clamps to insert the buttonettes into the eyelets. Insert the tip of the OESD Alligator Clamps into the eyelet, grasp the buttonette and pull through the eyelet. Alternatively, use a stiletto or tweezers to push the buttonette through the eyelet.

Helpful Tips

Limp Lace

If the design is not stiff enough, press the lace pieces on the wrong side while applying spray starch. After ironing, spray again with starch and allow to dry completely. This will stiffen the lace pieces nicely and aid in construction. Or easily re-stiffen by diluting some stabilizer scraps in water (or use liquid starch) and dipping the item in the solution. Lay flat to dry.

Eyelets Too Small

If any of the eyelets appear closed or too small to penetrate with Alligator Clamps, they may be stretched by inserting the small end of the OESD Perfect Point and Press Tool into the eyelet opening and stretching it open wide enough to accommodate the OESD Alligator Clamps.

Button Clips

During the assembly process, some structures pull on buttonettes that have already been inserted and could pull them out altogether. Putting a Button Clip on the assembled buttonette will keep it in position during the assembly process. Remove the Button Clips when the assembly is complete.

Alternative Construction Option

In some cases, the buttonettes may be pulled to the inside of a project, instead of being visible on the outside.

Insert the OESD Alligator Clamps through the eyelet from the wrong, or inside, of the lace and grasp the corresponding buttonette. Pull the buttonette to the wrong side of the lace.

Pulling the buttonettes to the inside may cause stress on the ones already done. Button clips may be placed on the completed buttonette(s) to prevent them from pulling out of the eyelet.

- Rinse each piece in warm running water until the design is only slightly tacky.
- Place right side down on a non-stick surface to dry. Parchment paper or a cooling rack work well. Dry completely.
- Once dry, press right side down on an OESD Perfect Embroidery Press Cloth.

Step 56

- Before assembly, use the OESD MiniMAT and the OESD Perfect Punch with the 3mm attachment to create the eyelets indicated in the diagram.
- Reference the Punch Tool Guides on page 38.
- **Tip: Take care to not cut the satin stitching.**

ASSEMBLY - POINSETTIA

□ Step 57

- Place a brad through the center eyelet of Poinsettia Flowers FSL (13017-11).

□ Step 58

- Place the brad with the Poinsettia Flowers through the center eyelet of Poinsettia Bracts 3 FSA (13017-10).

□ Step 59

- Place the brad through the center eyelet of Poinsettia Bracts 2 FSA (13017-09).

ASSEMBLY - POINSETTIA

□ Step 60

- Place the brad through the center eyelet of Poinsettia Bracts 1 FSA (13017-08).

□ Step 61

- Finally, place the brad through the center eyelet of Poinsettia Leaves FSA (13017-07).

ASSEMBLY - POINSETTIA

Step 62

- Bend each tab of the brad back against the leaves.
- Slightly offset each layer of the poinsettia.
- Shape as desired.

Step 63

- The Poinsettia Leaves piece has two loops on each side of the center circle. These loops can be used to attach the finished flower to items such as a wreath or a tree. It is shown with a ribbon through one loop here.

ASSEMBLY - POINSETTIA

□ Step 64

- The poinsettia is complete. Enjoy!

General Instructions

The applique instructions, included in the collection, are general instructions. For demonstration purposes, a sample design that best demonstrates the technique is shown. Design 13018-06 is shown here. Fabric and thread requirements will vary by design, but the general technique is the same. Applique technique shown is cut in place. Pre-cut applique patterns are included at the end of the instructions.

Note: Some thread colors in the instructions have been changed or digitally enhanced for better visibility.

Step 1

- Cut the applique fabric 1/4" – 1/2" larger than the applique pattern. The applique patterns are included at the end of the instructions.
- Adhere one layer of SoftWeb to the wrong side of the applique fabric to provide body to the fabric.
- **Note: Do not apply SoftWeb to the Iridescent Vinyl.**
