

Product Usage Instructions

Heat2Go

INSTRUCTIONS FOR TOPPING USE:

- Hoop item with appropriate stabilizer for fabric and design.
- Cut Heat2Go to fit over design area.
- Place bumpy side down on top of fabric, tape in place or lightly spray with temporary adhesive, if desired, to hold in place.
- Stitch design.

INSTRUCTIONS FOR STABILIZER USE:

- Use when all traces of stabilizer must disappear, and the fabric is moisture sensitive.
- Cut two pieces of Heat2Go approximately 2" larger than the hoop to be used and sandwich the fabric between them before hooping.
- Temporary adhesive spray may be used to keep fabric from slipping
- Use for buttonholes, cutwork and other sewing applications.

INSTRUCTIONS FOR REMOVAL:

- Remove the embroidered item from the hoop.
- Tear away as much of the excess Heat2Go as possible.
- Always test for heat tolerance on a sample of the fabric.
- Touch with an iron or move iron back and forth to melt stabilizer.
- Stabilizer may form small balls which are easily brushed away from most fabrics.
