

# Flower Napkin Corners

#PK10017  
4 DESIGNS

## MATERIALS

### Isacord Thread Colors

0010 Silky White  
0520 Daffodil  
1860 Shell

2650 Impatiens  
4740 Aquamarine

**Note: One spool of 1000 meter thread is adequate for the project unless otherwise noted.**

# MATERIALS

## Stabilizers

- OESD AquaMesh Plus WashAway

Note: Selected for this project as the area being embroidered is an edge and cannot be held securely by the embroidery hoop. The adhesive is water-soluble and will dissolve completely when the project is rinsed with warm running water.

## Fabrics/Textiles

- Napkins

## Notion & Tools

- OESD Expert Embroidery Tape WashAway
- OESD Perfect Embroidery Press Cloth
- OESD Grippy Grid

## Isacord Thread Colors

- Per thread chart
- Match bobbin thread to top thread

## General Instructions

The instructions included in the collection, are general instructions. For demonstration purposes, a sample design that best demonstrates the technique is shown.

Fabric and thread requirements will vary by design, but the general technique is the same.

Note: Some thread colors in instructions have been changed or digitally enhanced for better visibility.

### □ Step 1

- Hoop one layer of AquaMesh Plus with the paper (shiny) side up.
- Score and remove paper to reveal the adhesive surface.

### □ Step 2

- Stitch Machine Step 1, Corner Placement Stitch.

# EMBROIDERY

## □ Step 3

- Place the napkin so the edges of one corner align with the placement line.

## □ Step 4

- Stitch Machine Step 2, Cut Line and Tackdown.

## □ Step 5

- Trim the excess fabric as close to the cut line as possible. If the outermost stitches (cut line) are cut, the inner stitches (tackdown) will hold the napkin in place.

**IMPORTANT:** Be sure to trim on the side that will cut away the corner and leave the body intact.

Tip: If the stabilizer is cut or a hole is created while trimming the fabric, use Expert Embroidery Tape WashAway as a patch.

# EMBROIDERY

## □ Step 6

- Stitch the remaining machine steps, per thread chart.
- Match the bobbin thread to the upper thread.

## □ Step 7

- When the design is complete, remove the project from the hoop and trim the stabilizer 1/4" - 1/2" outside the design.

# EMBROIDERY

## □ Step 8

- Rinse in warm running water to remove the remaining AquaMesh Plus.
- Place right side down on a non-stick surface to dry. Parchment paper or a cooling rack will prevent curling. Dry completely.
- Once dry, press right side down on a Perfect Embroidery Press Cloth.
- ENJOY!
